Subject Index

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)

Accessory cells, Accessory cells in the human palatine tonsil (Bryan, *et al.*) **185,** 224, *dem*

Acetyl cholinesterase, Comparison of AChE and PGP 9·5 in cerebrovascular nerves of the rat (Matthijssen, *et al.*) **185,** 707, *dem*

Acrosomal formation, Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503

Actin, The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*

Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415

Adhesion molecules, Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*

Adrenal gland, Seasonal variation in cortical width of the adrenal gland of the sub-Antarctic fur seal (*Arctocephalus tropicalus*) (Williams & Bester) **185,** 685, *P*

A fourth cortical zone in the adrenals of the African elephant (*L. africana*) (Strassberger, *et al.*) **185,** 687, *P*

Age variation, Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587

Ageing, Myelinated axon density decreases with age in the human fornix (Salek Haddadi & Davies) **185,** 208, *P*

Morphometric analysis into the effects of age on the rat hypogastric and 13th thoracic ganglia (Warburton & Santer) **185,** 229, *dem*

Changes in the cell-free zone and cell-rich zone of human dental pulp with increasing age (Peverini & Daly) **185,** 691, *P*

Development, ageing and disease in nerves of the cardiovascular system (Cowen) **185,** 697, *P*

Human cerebrovascular nerves of the circle of Willis: topographical distribution and changes with ageing and Alzheimer's disease (Bleys, *et al.*) **185,** 700, *P*

NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*

Alimentary tract, A histocytochemical study of mucus glycoproteins or mucins in the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé & Coetzee) **185,** 688, *P*

Effect of short-chain fatty acids on intestinal mucosal structure of germ-free mice (Cowley & Hill) **185,** 688, *P*

Effect of lipopolysaccharide on the intestinal mucosal epithelium of germ-free mice (Hill & Cowley) **185,** 688, *P*

Characterisation of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*

Allometry, Allometric growth of the spinal cord in relation to the vertebral column during prenatal and postnatal life in the sheep (*Ovis aries*) (Ghazi & Gholami) **185,** 427

Altitude, Human placental chorangioma at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*

Morphometric diffusing capacity of the human placenta at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*

Alzheimer's disease, Human cerebrovascular nerves of the circle of Willis: topographical distribution and changes with ageing and Alzheimer's disease (Bleys, *et al.*) **185,** 700, *P*

Amniochorion, Dual channel localisation of α6β4 integrin and type VII collagen in human term amniochorion (Byrd, *et al.*) **185,** 710, *dem*

Amyloid, Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*

Anatomical variation, Anomalous median nerve associated with persistent median artery (Sañudo, *et al.*) **185,** 447

Anatomy teaching, Multimedia is an educational tool for the study of the embryological development of the human heart (Taylor, *et al.*) **185,** 685, *P*

Computer-assisted learning of anatomy (Gous) **185,** 685, *P*

Angiogenesis, Angiogenesis during muscle development in the embryonic chick limb bud (Orr) **185,** 215, *P*

In vitro and in vivo activity of synthetic urokinase plasminogen activator (uPA) fragments on angiogenesis and tumour invasion (Allen, *et al.*) **185,** 697, *P*

Stimulation of angiogenesis by glycolytic and oxidative metabolites on the chick chorioallantoic membrane (Murray, *et al.*) **185,** 698, *P*

Prostaglandins control the spatial organisation of blood vessels during angiotensin II induced angiogenesis in the chick embryo (Le Noble, *et al.*) **185,** 705, *dem*

Angiography, Tortuosity of the femoral artery during leg flexion: evaluation with MR angiography and cryomicrotomy (Wensing, *et al.*) **185,** 705, *dem*

Angiotensin II, Prostaglandins control the spatial organisation of blood vessels during angiotensin II induced angiogenesis in the chick embryo (Le Noble, *et al.*) **185,** 705, *dem*

Anisotrophic curve length, The estimation of anisotropic curve lengths using a line-cycloid con-oriented test grid (James) **185,** 220, *P*

Anti-oestrogen, Effects of an anti-oestrogen on normal human endometrial stroma around the time of implantation (Bulut, *et al.*) **185,** 224, *dem*

Aorta, A functional and structural examination of aorta from streptozotocin diabetic rats (Otter, *et al.*) **185,** 235, *dem*

Magnetic resonance imaging planes for the 3-dimensional characterisation of human coronary arteries (Gates, *et al.*) **185,** 335

Histology of the ascending aortic fold in a nonhuman primate, *Papio ursinus* (Lebona) **185,** 687, *P*

APD, Does 3-amino-1-hydroxypropylidene-1,1-bisphosphonate (APD) suppress in vitro the resorptive function of osteoclasts of different sizes unequally? (Piper, *et al.*) **185,** 231, *dem*

Apoptosis, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129

Arctocephalus tropicalus, Seasonal variation in cortical width of the adrenal gland of the sub-Antarctic fur seal (*Arctocephalus tropicalus*) (Williams & Bester) **185,** 685, *P*

Arhinencephaly, The arterial pattern at the base of arhinencephalic and holoprosencephalic brains (Overbeeke, *et al.*) **185,** 51

Arterial branching patterns, Non-planar curvature and branching of arteries: implications for arterial wall shear, biology and disease (Caro, *et al.*) **185,** 696, *P*

Arterial ligation, Hindpaw/floor contact area in the rat with unilateral ligation of the common iliac artery (Clarke & Rochester) **185,** 220, *P*

Artery, basilar, Haemodynamic factors influence taper in the basilar artery of man (Ravensbergen, *et al.*) **185,** 699, *P*

The relation between atherosclerosis and blood flow in the basilar artery (Kritger, *et al.*) **185,** 706, *dem*

Artery, femoral, Spiralling atherosclerotic lesions in the femoral artery (Wensing, *et al.*) **185,** 700, *P*

Artery femoral, Tortuosity of the femoral artery during leg flexion: evaluation with MR angiography and cryomicrotomy (Wensing, *et al.*) **185,** 705, *dem*

AS/AGU rat, Serotonergic deficits in the raphe nuclei of AS/AGU rats (Stewart, *et al.*) **185,** 702, *P*

Ascending aortic fold, Histology of the ascending aortic fold in a nonhuman primate, *Papio ursinus* (Lebona) **185,** 687, *P*

Astrocytes, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Atherosclerosis, Interleukin-1 in human atherosclerotic coronary arteries—location and cellular source (Armstrong) **185,** 217, *P*

Postmortem analysis of atherosclerotic human femoral arteries: paradoxical vessel wall shrinkage contributes to stenosis (Pasterkamp, *et al.*) **185,** 699, *P*

Spiralling atherosclerotic lesions in the femoral artery (Wensing, *et al.*) **185,** 700, *P*

The relation between atherosclerosis and blood flow in the basilar artery (Kritger, *et al.*) **185,** 706, *dem*

Atlantic salmon, Effect of prehatch temperature on the posthatch growth of muscle in the Atlantic salmon (Nathanailides, *et al.*) **185,** 705, *P*

Atrial natriuretic peptide, The distribution of atrial natriuretic peptide in various rat tissues (Lourens, *et al.*) **185,** 686, *P*

Auditory system development, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387

Auriculotemporal nerve, Communication between the facial and auriculotemporal nerves (Namking, *et al.*) **185,** 421

Australopithecines, A new cladistic reconstruction of hominid phylogeny following the discovery of *Australopithecus aethiopicus* (Kaszycka) **185,** 684, *P*

Robust australopithecines and certain specimens attributed to early *Homo*: are they congeneric? (Thackeray) **185,** 693, *P*

Authorware Professional, Evaluation of different forms of user interactions in computer based learning (CBL) packages for medical students constructed with Authorware Professional (Castle, *et al.*) **185,** 233, *dem*

Autografts, The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*

Autonomic nervous system, Development, ageing and disease in nerves of the cardiovascular system (Cowen) **185,** 697, *P*

Autonomic neurons, NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487

Autoradiography, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135

Avian excretion, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405

Avian eye, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637

Axon tracing, Tracing axons in the fixed rat brain: an accelerated DiI procedure (Orange) **185,** 215, *P*

Axonal sprouting, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Axonal vesicles, The fine structure of the human ovarian vein (Stones, *et al.*) **185,** 285

Axotomy, An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565

Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Baboon, Histology of the ascending aortic fold in a nonhuman primate, *Papio ursinus* (Lebona) **185,** 687, *P*

Fine structure of the fibrous layer of the mandibular condylar cartilage of the Chacma baboon (*Papio ursinus*) using postfixation in osmium–potassium ferrocyanide (Missankov) **185,** 690, *P*

Barriers, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387

Basal bodies, Development of basal bodies in bipolar cells of the olfactory epithelium (Loots & Lourens) **185,** 693, *P*

Basement membrane, Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325

Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529

Basicranial flexion, Basicranial flexion, relative brain size and facial kyphosis in humans (Ross & Henneberg) **185,** 689, *P*

Bat, The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*

Bergmann glia, Distribution of mRNA for the GABA transporter GAT-1 in the rat brain: evidence that GABA uptake is not limited to presynaptic neurons (Swan, *et al.*) **185,** 315

Beta cells, Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*

Betamethasone, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Biliary tree, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241

Bipolar cells, Development of basal bodies in bipolar cells of the olfactory epithelium (Loots & Lourens) **185,** 693, *P*

Black kite, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637

Blastocysts, Increased lectin binding capacity of trophoblastic cells of late day 5 rat blastocysts (Stein, *et al.*) **185,** 669

Blood flow, Intracardiac blood flow patterns related to the yolk sac circulation of the chick embryo (Hogers, *et al.*) **185,** 698, *P*

Blood vessels, The timing of vascular invasion of developing muscles in the chick limb (Murray & Wilson) **185,** 209, *P*

Morphology of high endothelial venules in human rheumatoid synovium (Brown, *et al.*) **185,** 210, *P*

Pathogenesis of cerebral vasospasm following experimental subarachnoid haemorrhage in rat—a double haemorrhage model (Khalili & Clower) **185,** 210, *P*

The immunocytochemcial localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*

Interleukin-1 in human atherosclerotic coronary arteries—location and cellular source (Armstrong) **185,** 217, *P*

Varicose veins: stereological analysis of the regional contents of collagen, elastin and smooth muscle (Brookes) **185,** 217, *P*

Human term placental capillary endothelial cell specialisation: a morphometric and enzyme histochemical study (Karimu & Burton) **185,** 219, *P*

Hindpaw/floor contact area in the rat with unilateral ligation of the common iliac artery (Clarke & Rochester) **185,** 220, *P*

Umbilical arterial waveforms and stereological estimates of the vasculature in normal term human placentas (Burton & Jauniaux) **185,** 222, *dem*

The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*

The rodent retro-orbital venous sinus and the harderian gland in the golden hamster (McGadey, *et al.*) **185,** 225, *dem*

Immunocytochemical localisation of Transforming Growth Factor Beta (TGF-β) in renal arterioles of normal and cyclosporin-treated rat kidneys (Raftery, *et al.*) **185,** 234, *dem*
Endothelial injury of cerebral arteries following experimental subarachnoid haemorrhage in rat—a scanning electron microscopy study (Khalili & Clower) **185,** 235, *dem*
The fine structure of the human ovarian vein (Stones, *et al.*) **185,** 285
Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Bone, Quantitative morphology of the subchondral plate of the tibial plateau (Milz & Putz) **185,** 103
An investigation into the possible viral aetiology of Paget's disease of bone (Fearon) **185,** 215, *P*
Bone graft demineralisation—a prerequisite for rapid human osteoblast attachment and repopulation (Doherty, *et al.*) **185,** 221, *P*
Net population migration of osteoclasts in vitro (Steel & Jones) **185,** 230, *dem*
Resorption-repair coupling in vitro (Gray, *et al.*) **185,** 230, *dem*
A structural predisposition to spontaneous fracture in racehorse bone (Haroon, *et al.*) **185,** 230, *dem*
Linear growth of chick third toe between stages 36 and 44 facilitates accurate staging; Hamburger and Hamilton revisited (Lawton, *et al.*) **185,** 231, *dem*
Does 3-amino-1-hydroxypropylidene-1,1-bisphosphonate (APD) suppress in vitro the resorptive function of osteoclasts of different sizes unequally? (Piper, *et al.*) **185,** 231, *dem*
The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369
Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587
The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599
Anatomical variations in the proximal part of the femur: differences between sexes and groups (Cutland) **185,** 684, *P*
The prevalence and size of the fabella (Durand & Meiring) **185,** 689, *P*
The presence of fibrocartilage on bones near tendon–bone junctions in man (Benjamin, *et al.*) **185,** 704, *P*
Bone marrow, A mechanism which may promote the transfer of haematopoiesis from the liver to the medullary cavities in mice (Blair & Thomas) **185,** 209, *P*
Book Reviews
Burton, R. F. *Physiology by Numbers. An Encouragement to Quantitative Thinking*, 1994 (revd by McPhate) **185,** 680
Cattanes, L. & Riva, A. *The Anatomical Waxes by Clemente Susihi of the University of Cagliari*, 1993 (revd by Bowden) **185,** 681

Tablonski, N. G. *Theropithecus: The Rise and Fall of a Primate Genus*, 1993 ed (revd by Wood) **185,** 681
Brain size, Basicranial flexion, relative brain size and facial kyphosis in humans (Ross & Henneberg) **185,** 689, *P*
Brainstem, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Bromodeoxyuridine, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Buccal mucosa, A comparative histological morphometric study of hamster palatal oral mucosa (Cheung, *et al.*) **185,** 708, *dem*
Immunohistochemical observations of overexpression on p53 protein in benign and malignant buccal epithelial lesions (Jin, *et al.*) **185,** 710, *dem*
Buffalo, The neuromuscular junction in the African elephant (*Loxodonta africana*) and buffalo (*Syncerus caffer*): an ultrastructural study (Wolf, *et al.*) **185,** 691, *P*

Cadavers, Screening donated corpses for HIV and hepatitis B (van Wolferen, *et al.*) **185,** 711, *dem*
Caecocolic lymphoid patches, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129
Calbindin-D28k, Extrinsic sources of calbindin-D28k immunoreactive fibres in rat stomach (Ali & Vaillant) **185,** 708, *dem*
Callithrix jacchus, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481
Capillaries, Progress in structural identification of the small pore system in continuous capillaries (Firth, *et al.*) **185,** 695, *P*
Carabelli trait, A morphometric study of the Carabelli trait in early South African hominids (Reid & van Reenen) **185,** 683, *P*
Carbohydrate epitopes, Increased lectin binding capacity of trophoblastic cells of late day 5 rat blastocysts (Stein, *et al.*) **185,** 669
Carbonic anhydrase, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405
Carcinoma, An ultrastructural analysis of differentiation in cultures of pluripotent human embryonal carcinoma cells (Andrews & Cope) **185,** 226, *dem*
Cardiac assist, Vascularisation of the latissimus dorsi muscle for cardiac assist (Craven, *et al.*) **185,** 706, *dem*
Cardiac imaging, Magnetic resonance imaging planes for the 3-dimensional characterisation of human coronary arteries (Gates, *et al.*) **185,** 335
Cardiovascular innervation, Development, ageing and disease in nerves of the cardiovascular system (Cowen) **185,** 697, *P*
Carnivores, The biomechanics of prehension and mastication in carnivores (Ksiezycka & Kieser) **185,** 689, *P*
Carp, Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Cartilage, Biophysics of tissue dehydration; overcoming deleterious effects of common dehydrating agents on the interlacunar network of young growth cartilage (Lawton, *et al.*) **185,** 231, *dem*
Age-related changes to the surface ultrastructure of the rabbit temporomandibular disc (Shaw & Molyneux) **185,** 577
Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587
Fine structure of the fibrous layer of the mandibular condylar cartilage of the Chacma baboon (*Papio ursinus*) using postfixation in osmium–potassium ferrocyanide (Missankov) **185,** 690, *P*
The presence of fibrocartilage on bones near tendon–bone junctions in man (Benjamin, *et al.*) **185,** 704, *P*
Cartilage bone, Occipital roof development in the Japanese musk shrew, *Suncus murinus* (Niida, *et al.*) **185,** 433
Cashmere goat, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
Cat, An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565
Catecholamines, The structure and development of dopaminergic interplexiform cells in the retina of the brown trout, *Salmo trutta fario*: a tyrosine hydroxylase immunocytochemical study (Becerra, *et al.*) **185,** 377

The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617

Cattle, The anatomical background to heel erosion in cattle (Leach, *et al.*) **185,** 221, *P*

CD44, The formation of human synovial joint cavities: a possible role for hyaluronan and CD44 in altered interzone cohesion (Edwards, *et al.*) **185,** 355

Cell culture, An ultrastructual analysis of differentiation in cultures of pluripotent human embryonal carcinoma cells (Andrews & Cope) **185,** 226, *dem*

Cell motility, The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599

Central nervous system, Myelinated axon density decreases with age in the human fornix (Salek Haddadi & Davies) **185,** 208, *P*

Differential expression of an endothelial barrier antigen (EBA) between the central and peripheral nervous systems of the rat (Lawrenson, *et al.*) **185,** 210, *P*

Oxytocin induces release of oxytocin from magnocellular dendrites and cell bodies of lactating female rats (Ward & Morris) **185,** 212, *P*

Down-regulation of serotonin transporter mRNA expression in the dorsal raphe nucleus of rat brain due to paroxetine (Swan) **185,** 215, *P*

Tracing axons in the fixed rat brain: an accelerated DiI procedure (Orange) **185,** 215, *P*

Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Centrioles, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301

Cerebellum, Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Morphological and morphometric alterations to the developing cerebellum of undernourished postnatal mice (Matta, *et al.*) **185,** 693, *P*

Visual pathways from the cerebral cortex and superior colliculus to the cerebellum of macaques (Glickstein, *et al.*) **185,** 702, *P*

Cerebral arteries, The arterial pattern at the base of arhinencephalic and holoprosencephalic brains (Overbeeke, *et al.*) **185,** 51

Do cerebral arteries adapt their size to haemodynamic conditions following the principle of minimum work? (van der Zwan, *et al.*) **185,** 706, *dem*

Cerebral cortex, Visual pathways from the cerebral cortex and superior colliculus to the cerebellum of macaques (Glickstein, *et al.*) **185,** 702, *P*

Cerebrovascular innervation, Whole mount sequential double staining for PGP 9·5 and NPY in human cerebrovascular nerves (Thunnissen, *et al.*) **185,** 707, *dem*

Comparison of AChE and PGP 9·5 in cerebrovascular nerves of the rat (Matthijssen, *et al.*) **185,** 707, *dem*

Cervical spine, Spinalis capitis, or an accessory paraspinous muscle? (Martin) **185,** 195

Chick, The timing of vascular invasion of developing muscles in the chick limb (Murray & Wilson) **185,** 209, *P*

Angiogenesis during muscle development in the embryonic chick limb bud (Orr) **185,** 215, *P*

Laminin expression in the developing chick eye (Runswick & Edgar) **185,** 229, *dem*

Linear growth of chick third toe between stages 36 and 44 facilitates accurate staging; Hamburger and Hamilton revisited (Lawton, *et al.*) **185,** 231, *dem*

The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599

Intracardiac blood flow patterns related to the yolk sac circulation of the chick embryo (Hogers, *et al.*) **185,** 698, *P*

The distribution of neurons producing nitric oxide in the brain of the domestic chick (*Gallus domesticus*) (Bradley, *et al.*) **185,** 707, *dem*

Chick embryo, Stimulation of angiogenesis by glycolytic and oxidative metabolites on the chick chorioallantoic membrane (Murray, *et al.*) **185,** 698, *P*

Prostaglandins control the spatial organisation of blood vessels during angiotensin II induced angiogenesis in the chick embryo (Le Noble, *et al.*) **185,** 705, *dem*

Chicken–quail chimeras, Development of the cardiac vasculature studied in chicken–quail chimeras (Poelmann, *et al.*) **185,** 698, *P*

Chlortetracycline assay, Calcium-related changes in human spermatozoa using the chlortetracycline assay (Perry, *et al.*) **185,** 234, *dem*

Chondrocytes, Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587

Chorangioma, Human placental chorangioma at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*

Chorioallantoic membrane, Stimulation of angiogenesis by glycolytic and oxidative metabolites on the chick chorioallantoic membrane (Murray, *et al.*) **185,** 698, *P*

Choroid plexus, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75

Chromatolysis, An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565

Chronic electrical stimulation, Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95

Ciliary ganglion, An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565

Circle of Willis, The arterial pattern at the base of arhinencephalic and holoprosencephalic brains (Overbeeke, *et al.*) **185,** 51

Human cerebrovascular nerves of the circle of Willis: topographical distribution and changes with ageing and Alzheimer's disease (Bleys, *et al.*) **185,** 700, *P*

Clenbuterol, Identification of proliferating mouse skeletal muscle satellite cells following compensatory overload and clenbuterol administration using confocal microscopy (Brotchie, *et al.*) **185,** 232, *dem*

Cluster analysis, A cluster analysis of the neurons of the rat interpeduncular nucleus (Gioia, *et al.*) **185,** 459

Collagen, Observations on the collagenous wavy pattern in the outer sheath of the human sciatic nerve (Stolinski) **185,** 211, *P*

Immunohistochemical distribution of type I, II and III collagens in the rabbit supraspinatus tendon insertion (Kumagai, *et al.*) **185,** 279

Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325

Collagen gels, Optimal conditions for the cryopreservation of cultured dermal fibroblast impregnated collagen gels (Teasdale) **185,** 215, *P*

Collagen, type VII, Dual channel localisation of $\alpha 6\beta 4$ integrin and type VII collagen in human term amniochorion (Byrd, *et al.*) **185,** 710, *dem*

Colon, Increase in immunoreactivity to endothelin-1 in the mucosal vasculature and epithelium of the large intestine during chronic hypoxia (Dikranian, *et al.*) **185,** 609

Projections of neurochemically identified neurons in the colon of the pig (Timmermans, *et al.*) **185,** 701, *P*

Alterations in nuclear and cellular volumes of normal and potentially premalignant epithelium during cellular differentiation of the human large bowel revealed by histological morphometry (Tipoe & White) **185,** 708, *dem*

A quantitative study of nucleolar organiser region volume density in the 'normal' human colorectal crypt (Morais, *et al.*) **185,** 709, *dem*

Colour thresholding, Colour thresholding in electronic light microscopy (Fermin) **185,** 207, *P*
Common marmoset, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481
Complement receptor, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75
Complex carbohydrates, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405
Computer assisted learning, Evaluation of different forms of user interactions in computer based learning (CBL) packages for medical students constructed with Authorware Professional (Castle, *et al.*) **185,** 233, *dem*
Computer aided learning programmes for surgery in the rat (Angel) **185,** 233, *dem*
Feedback evaluation of computer assisted learning (CAL) packages for medical students (Thomas) **185,** 234, *dem*
Confocal laser scanning microscopy, Studying anatomy with the confocal laser scanning microscope (Entwistle) **185,** 207, *P*
Connexins, Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*
Coronary arteries, Interleukin-1 in human atherosclerotic coronary arteries—location and cellular source (Armstrong) **185,** 217, *P*
Magnetic resonance imaging planes for the 3-dimensional characterisation of human coronary arteries (Gates, *et al.*) **185,** 335
Corrosion casts, The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369
Coturnix coturnix, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405
Crinophagy, Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*
Cruciate ligaments, The fibre bundle anatomy of human cruciate ligaments (Mommersteeg, *et al.*) **185,** 704, *P*
Cryopreservation, Cryopreservation of hydrated biological material (Dalen) **185,** 205, *P*
Optimal conditions for the cryopreservation of cultured dermal fibroblast impregnated collagen gels (Teasdale) **185,** 215, *P*
Crypt epithelium, The specialised structure of crypt epithelium in the human palatine tonsil and its functional significance (Perry) **185,** 111
Culture, Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325
Cutaneous nerves, Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553
Cyclosporin A, The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*
Immunocytochemical localisation of platelet derived growth factor (PDGF-BB) in hypertrophied juxtaglomerular cells of the kidneys of rats treated with cyclosporin (Cope, *et al.*) **185,** 213, *P*
Immunocytochemical localisation of Transforming Growth Factor Beta (TGF-β) in renal arterioles of normal and cyclosporin-treated rat kidneys (Raftery, *et al.*) **185,** 234, *dem*
Cyprinus carpio, Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Cytoarchitectonics, A cluster analysis of the neurons of the rat interpeduncular nucleus (Gioia, *et al.*) **185,** 459
Cytoskeleton, Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415
The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599

Dehydrating agents, Biophysics of tissue dehydration; overcoming deleterious effects of common dehydrating agents on the interlacunar network of young growth cartilage (Lawton, *et al.*) **185,** 231, *dem*
Dental pulp, Changes in the cell-free zone and cell-rich zone of human dental pulp with increasing age (Peverini & Daly) **185,** 691, *P*
Dermatomes, Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553
Diabetes mellitus, A functional and structural examination of aorta from streptozotocin diabetic rats (Otter, *et al.*) **185,** 235, *dem*
Structural and functional changes within the diabetic rat heart (Otter, *et al.*) **185,** 235, *dem*
Epithelial cell number and phenotype along rat small intestine and the effects of streptozotocin-induced diabetes (Zoubi, *et al.*) **185,** 703, *P*
Didelphis albiventris, Immunocytochemical study of the ontogeny of Peyer's patches in the Brazilian marsupial *Didelphis albiventris* (Coutinho, *et al.*) **185,** 347
Diet, Effects of high fat diet on mucosa of the rat small intestine (Kalia) **185,** 218, *P*
Diffusion capacity, Morphometric diffusing capacity of the human placenta in relation to sonographic assessment of maturity (Burton & Jauniaux) **185,** 223, *dem*
Morphometric diffusing capacity of the human placenta at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*
Dopamine, Dopamine deficits in a novel mutant rat with impaired locomotion (Payne, *et al.*) **185,** 211, *P*
Dorsal raphe nucleus, Down-regulation of serotonin transporter mRNA expression in the dorsal raphe nucleus of rat brain due to paroxetine (Swan) **185,** 215, *P*
Dorsal root ganglia, Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*
Morphometric analysis into the effects of age on the rat hypogastric and 13th thoracic ganglia (Warburton & Santer) **185,** 229, *dem*
Perikaryal projections of spinal ganglion neurons: quantitative differences between membrane domains in contact with different microenvironments (Pannese, *et al.*) **185,** 497

Electromagnetic fields, Nerve orientation with conflicting guidance cues (McCaig, *et al.*) **185,** 228, *dem*
Elephant, A fourth cortical zone in the adrenals of the African elephant (*L. africana*) (Strassberger, *et al.*) **185,** 687, *P*
A histocytochemical study of mucus glycoproteins or mucins in the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé & Coetzee) **185,** 688, *P*
Characterisation of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*
The neuromuscular junction in the African elephant (*Loxodonta africana*) and buffalo (*Syncerus caffer*): an ultrastructural study (Wolf, *et al.*) **185,** 691, *P*
Embryo, p185^{neu} is expressed in yolk sac during rat postimplantation development (Knezevic, *et al.*) **185,** 181
Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Intracardiac blood flow patterns related to the yolk sac circulation of the chick embryo (Hogers, *et al.*) **185,** 698, *P*
Embryogenesis, Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511
Embryonal carcinoma, An ultrastructural analysis of differentiation in cultures of pluripotent human embryonal carcinoma cells (Andrews & Cope) **185,** 226, *dem*
Enamel hypoplasia, Age at metabolic insults causing enamel hypoplasia in an Ancient population of Metaponto, Italy (Henneberg) **185,** 683, *P*

Endometrium, Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*
Effects of an anti-oestrogen on normal human endometrial stroma around the time of implantation (Bulut, *et al.*) **185,** 224, *dem*
Endoneurium, Proliferation of the perineurium into the endoneurium in dermal nerves of the guinea pig (Salpadoru) **185,** 215, *P*
Endothelial barrier antigen, Differential expression of an endothelial barrier antigen (EBA) between the central and peripheral nervous systems of the rat (Lawrenson, *et al.*) **185,** 210, *P*
Endothelial cells, Attachment and migration of endothelial cells in vitro: effects of epithelial growth factor (EGF) C loop (CVIGYSGDRC-NH2) and the laminin B1 (CDPGYIGSR-NH2) peptides (Allen, *et al.*) **185,** 209, *P*
Human term placental capillary endothelial cell specialisation: a morphometric and enzyme histochemical study (Karimu & Burton) **185,** 219, *P*
Endothelin-1, Increase in immunoreactivity to endothelin-1 in the mucosal vasculature and epithelium of the large intestine during chronic hypoxia (Dikranian, *et al.*) **185,** 609
Endothelium, Endothelial injury of cerebral arteries following experimental subarachnoid haemorrhage in rat—a scanning electron microscopy study (Khalili & Clower) **185,** 235, *dem*
Perivascular demyelination and intramyelenic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259
The fine structure of the human ovarian vein (Stones, *et al.*) **185,** 285
Enteric nervous system, Extrinsic sources of calbindin-D28k immunoreactive fibres in rat stomach (Ali & Vaillant) **185,** 708, *dem*
Enterocytes, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405
Epidermis, Ultrastuctural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511
Epiplexus cells, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75
Epithelial cells, Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543
Epithelial growth factor, Attachment and migration of endothelial cells in vitro: effects of epithelial growth factor (EGF) C loop (CVIGYSGDRC-NH2) and the laminin B1 (CDPGYIGSR-NH2) peptides (Allen, *et al.*) **185,** 209, *P*
Epithelium, Variation in the number and volume of villous and crypt epithelial cells along the rat small intestine (Zoubi, *et al.*) **185,** 227, *dem*
Effect of lipopolysaccharide on the intestinal mucosal epithelium of germ-free mice (Hill & Cowley) **185,** 688, *P*
Epithelial cell number and phenotype along rat small intestine and the effects of streptozotocin-induced diabetes (Zoubi, *et al.*) **185,** 703, *P*
Alterations in nuclear and cellular volumes of normal and potentially premalignant epithelium during cellular differentiation of the human large bowel revealed by histological morphometry (Tipoe & White) **185,** 708, *dem*
A comparative histological morphometric study of hamster palatal oral mucosa (Cheung, *et al.*) **185,** 708, *dem*
A quantitative study of nucleolar organiser region volume density in the 'normal' human colorectal crypt (Morais, *et al.*) **185,** 709, *dem*
Stereological estimates of nuclear volumes in the epithelial components of human parotid gland (Go, *et al.*) **185,** 709, *dem*
Immunohistochemical observations of overexpression on p53 protein in benign and malignant buccal epithelial lesions (Jin, *et al.*) **185,** 710, *dem*
Erythrocyte, Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415
Eye, Further evidence that formation of the uncrossed retinofugal projection in ferrets involves interactions between fibres from the two eyes (Taylor & Guillery) **185,** 208, *P*
Optic nerve hypoplasia in individuals affected by the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **185,** 211, *P*
Laminin expression in the developing chick eye (Runswick & Edgar) **185,** 229, *dem*

Fabella, The prevalence and size of the fabella (Durand & Meiring) **185,** 689, *P*
Face identification, The positioning and magnification of faces and skulls for photographic superimposition (Maat) **185,** 702, *P*
Facial nerve, Communication between the facial and auriculotemporal nerves (Namking, *et al.*) **185,** 421
Fallopian tubes, Physical interactions of human sperm with human uterine tube cells in vitro (Pacey, *et al.*) **185,** 218, *P*
Changes in surface area along human uterine tubes (Hill, *et al.*) **185,** 222, *dem*
Fatty acids, Effect of short-chain fatty acids on intestinal mucosal structure of germ-free mice (Cowley & Hill) **185,** 688, *P*
Femur, Anatomical variations in the proximal part of the femur: differences between sexes and groups (Cutland) **185,** 684, *P*
Ferret, Further evidence that formation of the uncrossed retinofugal projection in ferrets involves interactions between fibres from the two eyes (Taylor & Guillery) **185,** 208, *P*
Fetal alcohol syndrome, Optic nerve hypoplasia in individuals affected by the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **185,** 211, *P*
Fetal development, The formation of human synovial joint cavities: a possible role for hyaluronan and CD44 in altered interzone cohesion (Edwards, *et al.*) **185,** 355
Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543
Fibre area, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173
Fibre types, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173
Fibre-optic microscopy, A nonscanning, coherent fibre-optic microscope for the study of neurons in vivo (Angel, *et al.*) **185,** 207, *P*
Fibroblasts, Optimal conditions for the cryopreservation of cultured dermal fibroblast impregnated collagen gels (Teasdale) **185,** 215, *P*
Fibrocartilage, The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663
The presence of fibrocartilage on bones near tendon–bone junctions in man (Benjamin, *et al.*) **185,** 704, *P*
Fibrosis, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
Fish, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241
Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Effect of prehatch temperature on the posthatch growth of muscle in the Atlantic salmon (Nathanailides, *et al.*) **185,** 705, *P*
Flagellum, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301
Floor contact, Hindpaw/floor contact area in the rat with unilateral ligation of the common iliac artery (Clarke & Rochester) **185,** 220, *P*

Fluorescent probes, Selective intracellular localisation of fluorescent probes: biological and physicochemical mechanisms (Horobin) **185,** 206, *P*
Fornix, Myelinated axon density decreases with age in the human fornix (Salek Haddadi & Davies) **185,** 208, *P*
Fractures, A structural predisposition to spontaneous fracture in racehorse bone (Haroon, *et al.*) **185,** 230, *dem*
Freund's adjuvants, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
Fruit bat, Endocrine cells in the pancreas of the fruit bat, *Rousettus egyptiacus*: a quantitative and immunocytochemical study (Michelmore, *et al.*) **185,** 686, *P*
Fur seal, Seasonal variation in cortical width of the adrenal gland of the sub-Antarctic fur seal (*Arctocephalus tropicalus*) (Williams & Bester) **185,** 685, *P*
Fusimotor axons, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

GABAergic systems, Quantitative computer image analysis techniques as applied to a study of GABAergic systems in the thalamus (Kultas-Ilinsky) **185,** 206, *P*
Gap junctions, Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*
GAP-43, Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*
Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*
GFAp, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Glutamic acid decarboxylase, Distribution of mRNA for the GABA transporter GAT-1 in the rat brain: evidence that GABA uptake is not limited to presynaptic neurons (Swan, *et al.*) **185,** 315
Glycocalyx, A high resolution study of the glycocalyx of rat uterine epithelial cells during early pregnancy with the field emission gun scanning electron microscope (Jones & Murphy) **185,** 443
Glycoconjugates, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387
Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529
Glycolysis, Stimulation of angiogenesis by glycolytic and oxidative metabolites on the chick chorioallantoic membrane (Murray, *et al.*) **185,** 698, *P*
Glycoproteins, A histocytochemical study of mucus glycoproteins or mucins in the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé & Coetzee) **185,** 688, *P*
Characterisation of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*
Goat, The microanatomy of the vomeronasal organ of the male goat (Green & Baker) **185,** 687, *P*
Golden Hamster, The rodent retro-orbital venous sinus and the harderian gland in the golden hamster (McGadey, *et al.*) **185,** 225, *dem*
Gonadotrophs, Ultrastructural effects of 'Zoladex' in vivo on gonadotrophs of normal and hpg mice (Durnin & Morris) **185,** 214, *P*
Gonads, Anatomical variants of the human renal and gonadal vasculature (de Villiers) **185,** 684, *P*
Graft demineralisation, Bone graft demineralisation—a prerequisite for rapid human osteoblast attachment and repopulation (Doherty, *et al.*) **185,** 221, *P*
Grafting, Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325
Granule cells, Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*
Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*
Growth, Allometric growth of the spinal cord in relation to the vertebral column during prenatal and postnatal life in the sheep (*Ovis aries*) (Ghazi & Gholami) **185,** 427
Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587
Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587
Growth factors, Growth factors in the human fetal testis (Balboni, *et al.*) **185,** 703, *P*
Growth hormone deficiency, A morphometric study on the effects of growth hormone deficiency and reconstitution on the rat small intestine (Beer) **185,** 217, *P*
Hypertrophic response of the kidneys of normal and growth hormone deficient rats to uninephrectomy (Baillie, *et al.*) **185,** 226, *dem*
GSA I-B4, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Guinea pig, Proliferation of the perineurium into the endoneurium in dermal nerves of the guinea pig (Salpadoru) **185,** 215, *P*
NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487
Studies of the lymphatic vessel-associated neurons in the intestine of the guinea pig (Wang, *et al.*) **185,** 65
Gut-associated lymphoid tissue, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129

Haematopoiesis, A mechanism which may promote the transfer of haematopoiesis from the liver to the medullary cavities in mice (Blair & Thomas) **185,** 209, *P*
Hair follicles, Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511
Hair growth, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
Hair shaft, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
Hamburger and Hamilton staging, Linear growth of chick third toe between stages 36 and 44 facilitates accurate staging; Hamburger and Hamilton revisited (Lawton, *et al.*) **185,** 231, *dem*
Hamster, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387
The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*
A comparative histological morphometric study of hamster palatal oral mucosa (Cheung, *et al.*) **185,** 708, *dem*
Handedness, Peripheral rather than cortical control of right-handedness (Gutnik & Henneberg) **185,** 690, *P*
Harderian gland, The harderian gland: a tercentennial review (Payne) **185,** 1
The rodent retro-orbital venous sinus and the harderian gland in the golden hamster (McGadey, *et al.*) **185,** 225, *dem*
Head kidney, Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Heart, Structural and functional changes within the diabetic rat heart (Otter, *et al.*) **185,** 235, *dem*
Magnetic resonance imaging planes for the 3-dimensional characterisation of human coronary arteries (Gates, *et al.*) **185,** 335
Multimedia is an educational tool for the study of the

embryological development of the human heart (Taylor, *et al.*) **185,** 685, *P*
Development, ageing and disease in nerves of the cardiovascular system (Cowen) **185,** 697, *P*
Development of the cardiac vasculature studied in chicken–quail chimeras (Poelmann, *et al.*) **185,** 698, *P*
The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*
Vascularisation of the latissimus dorsi muscle for cardiac assist (Craven, *et al.*) **185,** 706, *dem*
Heel erosion, The anatomical background to heel erosion in cattle (Leach, *et al.*) **185,** 221, *P*
Hepatitis, Screening donated corpses for HIV and hepatitis B (van Wolferen, *et al.*) **185,** 711, *dem*
Hepatocyte growth factor, Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543
Hepatocyte growth factor receptor, Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543
Hepatocytes, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241
HGF receptor, Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543
High endothelial venules, Morphology of high endothelial venules in human rheumatoid synovium (Brown, *et al.*) **185,** 210, *P*
Hindpaw, Hindpaw/floor contact area in the rat with unilateral ligation of the common iliac artery (Clarke & Rochester) **185,** 220, *P*
HIV, Screening donated corpses for HIV and hepatitis B (van Wolferen, *et al.*) **185,** 711, *dem*
Holoprosencephaly, The arterial pattern at the base of arhinencephalic and holoprosencephalic brains (Overbeeke, *et al.*) **185,** 51
Hominids, A morphometric study of the Carabelli trait in early South African hominids (Reid & van Reenen) **185,** 683, *P*
A new cladistic reconstruction of hominid phylogeny following the discovery of *Australopithecus aethiopicus* (Kaszycka) **185,** 684, *P*
Robust australopithecines and certain specimens attributed to early *Homo*: are they congeneric? (Thackeray) **185,** 693, *P*
Horse, A structural predisposition to spontaneous fracture in racehorse bone (Haroon, *et al.*) **185,** 230, *dem*
Hyaluronan, The formation of human synovial joint cavities: a possible role for hyaluronan and CD44 in altered interzone cohesion (Edwards, *et al.*) **185,** 355
Hyperbolic ruler, Non-Euclidean geometry: the demonstration of the hyperbolic ruler for image analysis in anatomy (James) **185,** 227, *dem*
Hypogastric ganglion, Morphometric analysis into the effects of age on the rat hypogastric and 13th thoracic ganglia (Warburton & Santer) **185,** 229, *dem*
NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*
Hypoglossal nerve, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Hypoglossal nucleus, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Hypogonadism, Ultrastructural effects of 'Zoladex' in vivo on gonadotrophs of normal and hpg mice (Durnin & Morris) **185,** 214, *P*
Hypothyroidism, A morphometric study of rat uterus in hypothyroidism (Inuwa & Williams) **185,** 227, *dem*
Hypoxia, Increase in immunoreactivity to endothelin-1 in the mucosal vasculature and epithelium of the large intestine during chronic hypoxia (Dikranian, *et al.*) **185,** 609
Image analysis, Quantitative computer image analysis techniques as applied to a study of GABAergic systems in the thalamus (Kultas-Ilinsky) **185,** 206, *P*
Immunocytochemistry, The structure and development of dopaminergic interplexiform cells in the retina of the brown trout, *Salmo trutta fario*: a tyrosine hydroxylase immunocytochemical study (Becerra, *et al.*) **185,** 377
Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95
Immunoglobulin transport, The transport of IgG subclasses across the human placenta (Mongan & Ockleford) **185,** 219, *P*
Immunohistochemistry, The innervation of the splenic capsule in the guinea pig: an immunohistochemical and ultrastructural study (Elfvin, *et al.*) **185,** 267
Immunohistochemical distribution of type I, II and III collagens in the rabbit supraspinatus tendon insertion (Kumagai, *et al.*) **185,** 279
Immunomodulation, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
In vitro fertilisation, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481
Incisor teeth, Shovel-shaped incisors in the Vassekela and Hereros (Navsa & van Staden) **185,** 683, *P*
Infection, hepatitis B, Screening donated corpses for HIV and hepatitis B (van Wolferen, *et al.*) **185,** 711, *dem*
Infection, HIV, Screening donated corpses for HIV and hepatitis B (van Wolferen, *et al.*) **185,** 711, *dem*
Infiltration, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465
Innervation, The fine structure of the human ovarian vein (Stones, *et al.*) **185,** 285
Insulin-dependent diabetes mellitus, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465
Insulitis, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465
Integrin, Dual channel localisation of α6β4 integrin and type VII collagen in human term amniochorion (Byrd, *et al.*) **185,** 710, *dem*
Interactive laser videos, Developments in the use of interactive laser videos for learning gross anatomy (Peel & Beanlands) **185,** 232, *dem*
Interferon gamma, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75
Interleukin-1, Interleukin-1 in human atherosclerotic coronary arteries – location and cellular source (Armstrong) **185,** 217, *P*
Interparietal bone, Occipital roof development in the Japanese musk shrew, *Suncus murinus* (Niida, *et al.*) **185,** 433
Interpeduncular nucleus, A cluster analysis of the neurons of the rat interpeduncular nucleus (Gioia, *et al.*) **185,** 459
Interstitial cells, The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*
Intestinal mucosa, Effect of short-chain fatty acids on intestinal mucosal structure of germ-free mice (Cowley & Hill) **185,** 688, *P*
Effect of lipopolysaccharide on the intestinal mucosal epithelium of germ-free mice (Hill & Cowley) **185,** 688, *P*
Characterisation of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*
Intestine, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129
Studies of the lymphatic vessel-associated neurons in the intestine of the guinea pig (Wang, *et al.*) **185,** 65
Intrafusal fibres, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Iron Age, A possible case of treponemal infection from the Iron Age site of K2 (Henneberg & Steyn) **185,** 691, *P*
Cranial and postcranial growth reconstructed from skeletal material from the Iron Age site of K2 (Steyn & Henneberg) **185,** 692, *P*
An Iron Age burial from near Mariental, Namibia (Ross & Henneberg) **185,** 692, *P*
Ischaemic neuropathy, Perivascular demyelination and intramyelinic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259
Islet amyloid polypeptide, Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*
Islets of Langerhans, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465

Japanese monkey, Variations in the thoracic duct of the Japanese monkey (*Macaca fuscata*) (Inoue & Makita) **185,** 189
Joint innervation, The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663
Joints, Morphology of high endothelial venules in human rheumatoid synovium (Brown, *et al.*) **185,** 210, *P*
Distribution and structure of plasma cells in synovial tissue from patients with rheumatoid arthritis (Perry, *et al.*) **185,** 221, *P*
The formation of human synovial joint cavities: a possible role for hyaluronan and CD44 in altered interzone cohesion (Edwards, *et al.*) **185,** 355
Age-related changes to the surface ultrastructure of the rabbit temporomandibular disc (Shaw & Molyneux) **185,** 577
The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663
The fibre bundle anatomy of human cruciate ligaments (Mommersteeg, *et al.*) **185,** 704, *P*
Juxtaglomerular apparatus, Immunocytochemical localisation of platelet derived growth factor (PDGF-BB) in hypertrophied juxtaglomerular cells of the kidneys of rats treated with cyclosporin (Cope, *et al.*) **185,** 213, *P*
Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529

Kampmeier's foci, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
Kidney, The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*
Immunocytochemical localisation of platelet derived growth factor (PDGF-BB) in hypertrophied juxtaglomerular cells of the kidneys of rats treated with cyclosporin (Cope, *et al.*) **185,** 213, *P*
Renal ultrastructural changes in Pekin ducks exposed to methylmercury and lead in combination (Prasada Rao) **185,** 214, *P*
Hypertrophic response of the kidneys of normal and growth hormone deficient rats to uninephrectomy (Baillie, *et al.*) **185,** 226, *dem*
Immunocytochemical localisation of Transforming Growth Factor Beta (TGF-β) in renal arterioles of normal and cyclosporin-treated rat kidneys (Raftery, *et al.*) **185,** 234, *dem*
Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521
Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529
Anatomical variants of the human renal and gonadal vasculature (de Villiers) **185,** 684, *P*
A practical classification of the patterns of drainage of the renal veins (Satyapal & Mathura) **185,** 689, *P*
A possible secular trend in the incidence of anatomical variations in the renal vasculature (Satyapal & Henneberg) **185,** 692, *P*
Morphometry of the human renal veins in a South African population (Satyapal) **185,** 693, *P*
Knee joint, Quantitative morphology of the subchondral plate of the tibial plateau (Milz & Putz) **185,** 103
The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663
The fibre bundle anatomy of human cruciate ligaments (Mommersteeg, *et al.*) **185,** 704, *P*
Koala, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129
Kodak Photo-CD, Kodak Photo-CD in the teaching of the anatomical sciences (Stewart & Beanlands) **185,** 233, *dem*

Lacerta muralis, Perikaryal projections of spinal ganglion neurons: quantitative differences between membrane domains in contact with different microenvironments (Pannese, *et al.*) **185,** 497
Lacrymal gland, The harderian gland: a tercentennial review (Payne) **185,** 1
Lactation, Oxytocin induces release of oxytocin from magnocellular dendrites and cell bodies of lactating female rats (Ward & Morris) **185,** 212, *P*
Laminin, Attachment and migration of endothelial cells in vitro: effects of epithelial growth factor (EGF) C loop (CVIGYSGDRC-NH2) and the laminin B1 (CDPGYIGSR-NH2) peptides (Allen, *et al.*) **185,** 209, *P*
Laminin expression in the developing chick eye (Runswick & Edgar) **185,** 229, *dem*
Lasers, The use of resin casts to examine the effects of pulsed NdYAG lasers on human teeth (McGadey, *et al.*) **185,** 710, *dem*
Latissimus dorsi, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173
Latissimus dorsi muscle, Vascularisation of the latissimus dorsi muscle for cardiac assist (Craven, *et al.*) **185,** 706, *dem*
Lead, Renal ultrastructural changes in Pekin ducks exposed to methylmercury and lead in combination (Prasada Rao) **185,** 214, *P*
Lectin binding, Increased lectin binding capacity of trophoblastic cells of late day 5 rat blastocysts (Stein, *et al.*) **185,** 669
Lectins, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387
Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529
Sialylation of terminal saccharides of glycoconjugates expressed by murine molar tooth germs developing in vitro and in vivo (Jowett, *et al.*) **185,** 85
Leucocyte common antigen, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75
Leukaemia, Spatial and autocorrelation studies of nuclear chromatin distribution in normal monocytes, the cells of hairy cell leukaemia and in chronic lymphocytic leukaemia (James & James) **185,** 225, *dem*
Limb development, The timing of vascular invasion of developing muscles in the chick limb (Murray & Wilson) **185,** 209, *P*
Angiogenesis during muscle development in the embryonic chick limb bud (Orr) **185,** 215, *P*
Lipopolysaccharide, Effect of lipopolysaccharide on the intestinal mucosal epithelium of germ-free mice (Hill & Cowley) **185,** 688, *P*
Liver, A mechanism which may promote the transfer of haematopoiesis from the liver to the medullary cavities in mice (Blair & Thomas) **185,** 209, *P*

The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241

Lizard, Perikaryal projections of spinal ganglion neurons: quantitative differences between membrane domains in contact with different microenvironments (Pannese, *et al.*) **185,** 497

Locomotion, Dopamine deficits in a novel mutant rat with impaired locomotion (Payne, *et al.*) **185,** 211, *P*

Lower intestine, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405

Loxodonta africana, A fourth cortical zone in the adrenals of the African elephant (*L. africana*) (Strassberger, *et al.*) **185,** 687, *P*

The neuromuscular junction in the African elephant (*Loxodonta africana*) and buffalo (*Syncerus caffer*): an ultrastructural study (Wolf, *et al.*) **185,** 691, *P*

A histocytochemical study of mucus glycoproteins or mucins in the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé & Coetzee) **185,** 688, *P*

Characterization of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*

Lymph nodes, Variations in the thoracic duct of the Japanese monkey (*Macaca fuscata*) (Inoue & Makita) **185,** 189

Lymph sinus, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129

Lymphoid tissue, The specialised structure of crypt epithelium in the human palatine tonsil and its functional significance (Perry) **185,** 111

Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521

Lymphokines, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75

Lymphoma, Quantitative cytochemistry of developing macrophages in malignant lymphoma (Sokol, *et al.*) **185,** 226, *dem*

Macaca fascicularis, An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565

Macrophages, Quantitative cytochemistry of developing macrophages in malignant lymphoma (Sokol, *et al.*) **185,** 226, *dem*

Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Macula densa, Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529

Magnetic resonance, Magnetic resonance imaging planes for the 3-dimensional characterisation of human coronary arteries (Gates, *et al.*) **185,** 335

Magnetic resonance imaging, Tortuosity of the femoral artery during leg flexion: evaluation with MR angiography and cryomicrotomy (Wensing, *et al.*) **185,** 705, *dem*

Major histocompatibility antigens, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75

Malignancy, Immunohistochemical observations of overexpression on p53 protein in benign and malignant buccal epithelial lesions (Jin, *et al.*) **185,** 710, *dem*

Mandible, Fine structure of the fibrous layer of the mandibular condylar cartilage of the Chacma baboon (*Papio ursinus*) using postfixation in osmium–potassium ferrocyanide (Missankov) **185,** 690, *P*

Mandibular condyle, Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587

Marsupials, The arrangement of gut-associated lymphoid tissues and lymph pathways in the koala (*Phascolarctos cinereus*) (Hanger & Heath) **185,** 129

Immunocytochemical study of the ontogeny of Peyer's patches in the Brazilian marsupial *Didelphis albiventris* (Coutinho, *et al.*) **185,** 347

Masseter muscle, Rabbit masseter motor unit fibres are heterogeneous in their expression of myosin heavy chain isoforms (Weijs & Kwa) **185,** 704, *P*

Mastication, The biomechanics of prehension and mastication in carnivores (Ksiezycka & Kieser) **185,** 689, *P*

Median artery, Anomalous median nerve associated with persistent median artery (Sañudo, *et al.*) **185,** 447

Median nerve, Anomalous median nerve associated with persistent median artery (Sañudo, *et al.*) **185,** 447

Melanosomes, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637

Melatonin, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135

Membrane bone, Occipital roof development in the Japanese musk shrew, *Suncus murinus* (Niida, *et al.*) **185,** 433

Membrane skeleton, Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415

Meniscus, The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663

Merkel cell, Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511

Met-enkephalin, Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511

Methacrylate, High resolution light microscopy: quantitative studies using methacrylate resin embedding techniques in combination with histochemistry (Gerrits) **185,** 205, *P*

Methimazole, Morphometric assessment of the thyroid gland of the rat following methimazole treatment (Inuwa & Williams) **185,** 227, *dem*

Methylmercury, Renal ultrastructural changes in Pekin ducks exposed to methylmercury and lead in combination (Prasada Rao) **185,** 214, *P*

Mice, Ultrastructural effects of 'Zoladex' in vivo on gonadotrophs of normal and hpg mice (Durnin & Morris) **185,** 214, *P*

Sialylation of terminal saccharides of glycoconjugates expressed by murine molar tooth germs developing in vitro and in vivo (Jowett, *et al.*) **185,** 85

Microautoradiography, Image interpretation in microautoradiography (Williams) **185,** 206, *P*

Microglia, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537

Microtrabecular lattice, The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599

Microvasculature, The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369

Milky spots, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Milvus migrans, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637

Mitochondria, The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*

Molar agenesis, Mandibular third molar agenesis in the South African Black population (Chorn & Henneberg) **185,** 684, *P*

Monkey, Variations in the thoracic duct of the Japanese monkey (*Macaca fuscata*) (Inoue & Makita) **185,** 189

An ultrastructural study of the ciliary ganglia of cat and monkey (*Macaca fascicularis*) following section of the short ciliary nerves (Zhang, *et al.*) **185,** 565

Monkey, macaque, Visual pathways from the cerebral cortex and superior colliculus to the cerebellum of macaques (Glickstein, *et al.*) **185,** 702, *P*

Monocytes, Spatial and autocorrelation studies of nuclear chromatin distribution in normal monocytes, the cells of hairy cell leukaemia and in chronic lymphocytic leukaemia (James & James) **185,** 225, *dem*

Morphometry, Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95

Motor endings, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Motor innervation, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Motor unit development, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Mouse, Somatotopy in the developing murine trigeminal system is established from the onset of neural outgrowth (Scott & Atkinson) **185,** 208, *P*

A mechanism which may promote the transfer of haematopoiesis from the liver to the medullary cavities in mice (Blair & Thomas) **185,** 209, *P*

Optic nerve hypoplasia in individuals affected by the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **185,** 211, *P*

Structural changes in the mouse thymus during pregnancy (Clarke, *et al.*) **185,** 212, *P*

Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*

The effects of retinoic acid on primary cultured adult mouse sensory neurons (Chong, *et al.*) **185,** 228, *dem*

Identification of proliferating mouse skeletal muscle satellite cells following compensatory overload and clenbuterol administration using confocal microscopy (Brotchie, *et al.*) **185,** 232, *dem*

Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397

Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511

Morphometric study of the optic nerve of adult normal mice and mice heterozygous for the *Small eye* mutation (*Sey* /+) (Dangata, *et al.*) **185,** 627

Effect of lipopolysaccharide on the intestinal mucosal epithelium of germ-free mice (Hill & Cowley) **185,** 688, *P*

Effect of short-chain fatty acids on intestinal mucosal structure of germ-free mice (Cowley & Hill) **185,** 688, *P*

Morphological and morphometric alterations to the developing cerebellum of undernourished postnatal mice (Matta, *et al.*) **185,** 693, *P*

Preliminary observations on prenatal ossification in the pouched mouse (*Saccostomus campestris*) (Soley, *et al.*) **185,** 694, *P*

Mucosa, Effects of high fat diet on mucosa of the rat small intestine (Kalia) **185,** 218, *P*

Mucosal protection, The specialised structure of crypt epithelium in the human palatine tonsil and its functional significance (Perry) **185,** 111

Mucus, A histocytochemical study of mucus glycoproteins or mucins in the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé & Coetzee) **185,** 688, *P*

Characterisation of mucus glycoproteins in the intestinal mucosa of the African elephant (*Loxodonta africana*) following lectin histochemistry (Coetzee, *et al.*) **185,** 690, *P*

Muscle, The timing of vascular invasion of developing muscles in the chick limb (Murray & Wilson) **185,** 209, *P*

The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*

Angiogenesis during muscle development in the embryonic chick limb bud (Orr) **185,** 215, *P*

Quantitative studies on the chromatin distribution within nuclei of nuclear bag and nuclear chain intrafusal muscle fibres (Brookes & James) **185,** 225, *dem*

The role of topography during skeletal myogenesis in vivo and in vitro (Evans, *et al.*) **185,** 232, *dem*

Identification of proliferating mouse skeletal muscle satellite cells following compensatory overload and clenbuterol administration using confocal microscopy (Brotchie, *et al.*) **185,** 232, *dem*

Rabbit masseter motor unit fibres are heterogeneous in their expression of myosin heavy chain isoforms (Weijs & Kwa) **185,** 704, *P*

Effect of prehatch temperature on the posthatch growth of muscle in the Atlantic salmon (Nathanailides, *et al.*) **185,** 705, *P*

Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95

Muscle, cardiac, Growth of vessels in adult cardiac and skeletal muscle under physiological and pathological cirucumstances (Hudlicka) **185,** 696, *P*

Development of the cardiac vasculature studied in chicken–quail chimeras (Poelmann, *et al.*) **185,** 698, *P*

The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*

Muscle histochemistry, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173

Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95

Muscle, skeletal, Growth of vessels in adult cardiac and skeletal muscle under physiological and pathological cirucumstances (Hudlicka) **185,** 696, *P*

Muscle spindles, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Quantitative studies on the chromatin distribution within nuclei of nuclear bag and nuclear chain intrafusal muscle fibres (Brookes & James) **185,** 225, *dem*

Musk shrew, Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503

Mutant, Dopamine deficits in a novel mutant rat with impaired locomotion (Payne, *et al.*) **185,** 211, *P*

Myelin, Perivascular demyelination and intramyelinic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259

Myobacteria, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Myogenesis, The role of topography during skeletal myogenesis in vivo and in vitro (Evans, *et al.*) **185,** 232, *dem*

Myosin, Rabbit masseter motor unit fibres are heterogeneous in their expression of myosin heavy chain isoforms (Weijs & Kwa) **185,** 704, *P*

Myosin ATPase, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173

Myosin heavy chain, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173

NADPH diaphorase, NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487

NADPH-diaphorase, NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*

Nephrectomy, Hypertrophic response of the kidneys of normal and growth hormone deficient rats to uninephrectomy (Baillie, *et al.*) **185,** 226, *dem*

Nerve fibre orientation, Nerve orientation with conflicting guidance cues (McCaig, *et al.*) **185,** 228, *dem*

Nerve growth factor, The role of nerve growth factor in attracting regenerating axons of a sectioned nerve towards the distal stump in rats (Doubleday & Robinson) **185,** 207, *P*

Nerve regeneration, The role of nerve growth factor in attracting regenerating axons of a sectioned nerve towards the distal stump in rats (Doubleday & Robinson) **185,** 207, *P*

Neural development, Somatotopy in the developing murine trigeminal system is established from the onset of neural outgrowth (Scott & Atkinson) **185,** 208, *P*

Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553

Neurodegenerative disease, The cell line NTera 2 in the study of common neurodegenerative diseases (Watson, *et al.*) **185,** 228, *dem*

Neuromuscular junction, The neuromuscular junction in the African elephant (*Loxodonta africana*) and buffalo (*Syncerus caffer*): an ultrastructural study (Wolf, *et al.*) **185,** 691, *P*

Neurons, A nonscanning, coherent fibre-optic microscope for the study of neurons in vivo (Angel, *et al.*) **185,** 207, *P*

Oxytocin induces release of oxytocin from magnocellular dendrites and cell bodies of lactating female rats (Ward & Morris) **185,** 212, *P*

The effects of retinoic acid on primary cultured adult mouse sensory neurons (Chong, *et al.*) **185,** 228, *dem*

Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*

Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*

Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*

A cluster analysis of the neurons of the rat interpeduncular nucleus (Gioia, *et al.*) **185,** 459

Serotonergic deficits in the raphe nuclei of AS/AGU rats (Stewart, *et al.*) **185,** 702, *P*

The distribution of neurons producing nitric oxide in the brain of the domestic chick (*Gallus domesticus*) (Bradley, *et al.*) **185,** 707, *dem*

Neurons, autonomic, Neuropeptides and neuronal markers in the human vas deferens and seminal vesicle of infants and children (Dixon & Gosling) **185,** 701, *P*

NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*

Neurons, enteric, Projections of neurochemically identified neurons in the colon of the pig (Timmermans, *et al.*) **185,** 701, *P*

Neuropeptide Y, Whole mount sequential double staining for PGP 9·5 and NPY in human cerebrovascular nerves (Thunnissen, *et al.*) **185,** 707, *dem*

Neuropeptides, The innervation of the splenic capsule in the guinea pig: an immunohistochemical and ultrastructural study (Elfvin, *et al.*) **185,** 267

Neuropeptides and neuronal markers in the human vas deferens and seminal vesicle of infants and children (Dixon & Gosling) **185,** 701, *P*

Neurotransmitter uptake, Distribution of mRNA for the GABA transporter GAT-1 in the rat brain: evidence that GABA uptake is not limited to presynaptic neurons (Swan, *et al.*) **185,** 315

Nitric oxide, NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487

Nitric oxide synthase, The distribution of neurons producing nitric oxide in the brain of the domestic chick (*Gallus domesticus*) (Bradley, *et al.*) **185,** 707, *dem*

NOD mice, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465

Non-Euclidean geometry, Non-Euclidean geometry: the demonstration of the hyperbolic ruler for image analysis in anatomy (James) **185,** 227, *dem*

Nonsurgical embryo transfer, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481

Noradrenergic innervation, Noradrenergic innervation of the rat thymus during pregnancy and the postpartum period (Kendall, *et al.*) **185,** 213, *P*

The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617

Noradrenergic nerves, The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617

Noradrenergic noncholinergic transmission, NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487

NTera 2 cell line, The cell line NTera 2 in the study of common neurodegenerative diseases (Watson, *et al.*) **185,** 228, *dem*

Nuclear chromatin, Quantitative studies on the chromatin distribution within nuclei of nuclear bag and nuclear chain intrafusal muscle fibres (Brookes & James) **185,** 225, *dem*

Spatial and autocorrelation studies of nuclear chromatin distribution in normal monocytes, the cells of hairy cell leukaemia and in chronic lymphocytic leukaemia (James & James) **185,** 225, *dem*

Nuclear volume, Stereological estimates of nuclear volumes in the epithelial components of human parotid gland (Go, *et al.*) **185,** 709, *dem*

Nucleolar organiser, A quantitative study of nucleolar organiser region volume density in the 'normal' human colorectal crypt (Morais, *et al.*) **185,** 709, *dem*

Nutrition, Morphological and morphometric alterations to the developing cerebellum of undernourished postnatal mice (Matta, *et al.*) **185,** 693, *P*

Occipital squama, The fusion of ossification centres in the cartilaginous and membranous parts of the occipital squama in human fetuses (Matsumura, *et al.*) **185,** 295

Occipitocervical sclerotomes, Occipitocervical segmentation in staged human embryos (Müller & O'Rahilly) **185,** 251

Occipitocervical segmentation, Occiptocervical segmentation in staged human embryos (Müller & O'Rahilly) **185,** 251

Odontogenesis, Sialylation of terminal saccharides of glycoconjugates expressed by murine molar tooth germs developing in vitro and in vivo (Jowett, *et al.*) **185,** 85

Olfactory epithelium, Development of basal bodies in bipolar cells of the olfactory epithelium (Loots & Lourens) **185,** 693, *P*

Ontogeny, Immunocytochemical study of the ontogeny of Peyer's patches in the Brazilian marsupial *Didelphis albiventris* (Coutinho, *et al.*) **185,** 347

Opossum, Immunocytochemical study of the ontogeny of Peyer's patches in the Brazilian marsupial *Didelphis albiventris* (Coutinho, *et al.*) **185,** 347

Optic nerve, Optic nerve hypoplasia in individuals affected by the

fetal alcohol syndrome: a mouse model (Parson, *et al.*) **185,** 211, *P*
Morphometric study of the optic nerve of adult normal mice and mice heterozygous for the *Small eye* mutation (*Sey /+*) (Dangata, *et al.*) **185,** 627
Optic nerve injury, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643
Osmoregulation, The harderian gland: a tercentennial review (Payne) **185,** 1
Ossification, Preliminary observations on prenatal ossification in the pouched mouse (*Saccostomus campestris*) (Soley, *et al.*) **185,** 694, *P*
Ossification centres, The fusion of ossification centres in the cartilaginous and membranous parts of the occipital squama in human fetuses (Matsumura, *et al.*) **185,** 295
Osteoblasts, Bone graft demineralisation—a prerequisite for rapid human osteoblast attachment and repopulation (Doherty, *et al.*) **185,** 221, *P*
Osteoclasts, Net population migration of osteoclasts in vitro (Steel & Jones) **185,** 230, *dem*
Does 3-amino-1-hydroxypropylidene-1,1-bisphosphonate (APD) suppress in vitro the resorptive function of osteoclasts of different sizes unequally? (Piper, *et al.*) **185,** 231, *dem*
The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599
Ostrich, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301
Ovary, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481
Oviduct, Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Oxidative metabolism, Stimulation of angiogenesis by glycolytic and oxidative metabolites on the chick chorioallantoic membrane (Murray, *et al.*) **185,** 698, *P*
Oxytocin, Oxytocin induces release of oxytocin from magnocellular dendrites and cell bodies of lactating female rats (Ward & Morris) **185,** 212, *P*

p185^{neu} oncogene, p185^{neu} is expressed in yolk sac during rat postimplantation development (Knezevic, *et al.*) **185,** 181
p23 protein, Immunohistochemical observations of overexpression on p53 protein in benign and malignant buccal epithelial lesions (Jin, *et al.*) **185,** 710, *dem*
PAF-antagonist, Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Paget's disease, An investigation into the possible viral aetiology of Paget's disease of bone (Fearon) **185,** 215, *P*
Palate, A comparative histological morphometric study of hamster palatal oral mucosa (Cheung, *et al.*) **185,** 708, *dem*
Palatine tonsil, The specialised structure of crypt epithelium in the human palatine tonsil and its functional significance (Perry) **185,** 111
Accessory cells in the human palatine tonsil (Bryan, *et al.*) **185,** 224, *dem*
Pancreas, Crinophagy provides a route for islet amyloid polypeptide (IAPP) degradation but does not maintain a stable granule population in the β cells of mouse islets (Badman, *et al.*) **185,** 214, *P*
Endocrine cells in the pancreas of the fruit bat, *Rousettus egyptiacus*: a quantitative and immunocytochemical study (Michelmore, *et al.*) **185,** 686, *P*
Pancreatic ductules, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465
Papio ursinus, Histology of the ascending aortic fold in a nonhuman primate, *Papio ursinus* (Lebona) **185,** 687, *P*
Fine structure of the fibrous layer of the mandibular condylar cartilage of the Chacma baboon (*Papio ursinus*) using postfixation in osmium–potassium ferrocyanide (Missankov) **185,** 690, *P*
Parotid duct, Morphology and development of the main parotid duct of the rat (O'Boyle) **185,** 216, *P*
Parotid gland, Stereological estimates of nuclear volumes in the epithelial components of human parotid gland (Go, *et al.*) **185,** 709, *dem*
Paroxetine, Down-regulation of serotonin transporter mRNA expression in the dorsal raphe nucleus of rat brain due to paroxetine (Swan) **185,** 215, *P*
Peanut agglutinin, Changing patterns of peanut agglutinin labelling in the dorsal cochlear nucleus correspond to axonal ingrowth (Riggs & Schweitzer) **185,** 387
Pectin oculi, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637
Pekin duck, Renal ultrastructural changes in Pekin ducks exposed to methylmercury and lead in combination (Prasada Rao) **185,** 214, *P*
Perineurium, Proliferation of the perineurium into the endoneurium in dermal nerves of the guinea pig (Salpadoru) **185,** 215, *P*
Periosteum, The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369
The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369
Peripheral nerve, The role of nerve growth factor in attracting regenerating axons of a sectioned nerve towards the distal stump in rats (Doubleday & Robinson) **185,** 207, *P*
Differential expression of an endothelial barrier antigen (EBA) between the central and peripheral nervous systems of the rat (Lawrenson, *et al.*) **185,** 210, *P*
Observations on the collagenous wavy pattern in the outer sheath of the human sciatic nerve (Stolinski) **185,** 211, *P*
Proliferation of the perineurium into the endoneurium in dermal nerves of the guinea pig (Salpadoru) **185,** 215, *P*
Nerve orientation with conflicting guidance cues (McCaig, *et al.*) **185,** 228, *dem*
Perivascular demyelination and intramyelinic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259
The cutaneous branch of the human suprascapular nerve (Ajmani) **185,** 439
A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Changes in length of peripheral nerve beds of the lower limb during movements of adjacent joints (Beith, *et al.*) **185,** 700, *P*
Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*
Morphometric analysis into the effects of age on the rat hypogastric and 13th thoracic ganglia (Warburton & Santer) **185,** 229, *dem*
Persorption, Quantitative and morphological investigations of the phenomenon of persorption in the rat (Carr, *et al.*) **185,** 220, *P*
Peyer's patches, Immunocytochemical study of the ontogeny of Peyer's patches in the Brazilian marsupial *Didelphis albiventris* (Coutinho, *et al.*) **185,** 347
PGP 9·5, Whole mount sequential double staining for PGP 9·5 and NPY in human cerebrovascular nerves (Thunnissen, *et al.*) **185,** 707, *dem*
Pharyngeal arches, The embryology of the 5th pharyngeal arch artery (de Ruiter & Gittenberger-De Groot) **185,** 699, *P*
Pharyngeal tonsil, Ultrastructural changes in the pharnygeal tonsil of children suffering from recurrent respiratory diseases (Kapeller, *et al.*) **185,** 236, *dem*
Pheromones, The harderian gland: a tercentennial review (Payne) **185,** 1
Photoperiodicity, Growth of secondary hair follicles of the

cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
Photoprotection, The harderian gland: a tercentennial review (Payne) **185,** 1
Pig, Projections of neurochemically identified neurons in the colon of the pig (Timmermans, *et al.*) **185,** 701, *P*
Placenta, Gestational changes in the star volumes of human placental villous trabeculae and intervillous pores (Wadrop & Mayhew) **185,** 219, *P*
Human term placental capillary endothelial cell specialisation: a morphometric and enzyme histochemical study (Karimu & Burton) **185,** 219, *P*
The transport of IgG subclasses across the human placenta (Mongan & Ockleford) **185,** 219, *P*
Umbilical arterial waveforms and stereological estimates of the vasculature in normal term human placentas (Burton & Jauniaux) **185,** 222, *dem*
Human placental growth: hyperplastic or hypertrophic? (Simpson, *et al.*) **185,** 222, *dem*
Human placental chorangioma at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*
Morphometric diffusing capacity of the human placenta in relation to sonographic assessment of maturity (Burton & Jauniaux) **185,** 223, *dem*
Morphometric diffusing capacity of the human placenta at high altitude (Reshetnikova, *et al.*) **185,** 223, *dem*
Plasma cells, Distribution and structure of plasma cells in synovial tissue from patients with rheumatoid arthritis (Perry, *et al.*) **185,** 221, *P*
Platelet activating factor, Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Platelet-derived growth factor, Immunocytochemical localisation of platelet derived growth factor (PDGF-BB) in hypertrophied juxtaglomerular cells of the kidneys of rats treated with cyclosporin (Cope, *et al.*) **185,** 213, *P*
Pleura, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
Podosomes, The cytoskeletal framework of chick osteoclasts in resin-less sections (Kato & Akisaka) **185,** 599
Porphyrins, The harderian gland: a tercentennial review (Payne) **185,** 1
Postischaemic injury, Perivascular demyelination and intramyelinic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259
Pouched mouse, Preliminary observations on prenatal ossification in the pouched mouse (*Saccostomus campestris*) (Soley, *et al.*) **185,** 694, *P*
Pregnancy, Structural changes in the mouse thymus during pregnancy (Clarke, *et al.*) **185,** 212, *P*
Noradrenergic innervation of the rat thymus during pregnancy and the postpartum period (Kendall, *et al.*) **185,** 213, *P*
Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*
Gestational changes in the star volumes of human placental villous trabeculae and intervillous pores (Wadrop & Mayhew) **185,** 219, *P*
Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
A high resolution study of the glycocalyx of rat uterine epithelial cells during early pregnancy with the field emission gun scanning electron microscope (Jones & Murphy) **185,** 443
The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617
Prehension, The biomechanics of prehension and mastication in carnivores (Ksiezycka & Kieser) **185,** 689, *P*
Preimplantation diagnosis, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481
Premalignancy, Alterations in nuclear and cellular volumes of normal and potentially premalignant epithelium during cellular differentiation of the human large bowel revealed by histological morphometry (Tipoe & White) **185,** 708, *dem*
Prolactin, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
Prostaglandins, Prostaglandins control the spatial organisation of blood vessels during angiotensin II induced angiogenesis in the chick embryo (Le Noble, *et al.*) **185,** 705, *dem*
Protein gene product 9·5, The innervation of the splenic capsule in the guinea pig: an immunohistochemical and ultrastructural study (Elfvin, *et al.*) **185,** 267
Comparison of AChE and PGP 9·5 in cerebrovascular nerves of the rat (Matthijssen, *et al.*) **185,** 707, *dem*
Proteoglycans, Age-related changes to the surface ultrastructure of the rabbit temporomandibular disc (Shaw & Molyneux) **185,** 577
Pseudopregnancy, Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397
Purkinje cells, Distribution of mRNA for the GABA transporter GAT-1 in the rat brain: evidence that GABA uptake is not limited to presynaptic neurons (Swan, *et al.*) **185,** 315

Quail, The integrative segment of the quail *Coturnix coturnix japonica*. Occurrence and distribution of carbonic anhydrase and complex carbohydrates (Gabrielli & Menghi) **185,** 405

Rabbit, Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529
Age-related changes to the surface ultrastructure of the rabbit temporomandibular disc (Shaw & Molyneux) **185,** 577
The attachments of the rabbit medial meniscus. A morphological investigation using image analysis and immunohistochemistry (Gao, *et al.*) **185,** 663
Fibre type composition of rabbit tibialis anterior and extensor digitorum longus muscles (Lexell, *et al.*) **185,** 95
Racehorses, A structural predisposition to spontaneous fracture in racehorse bone (Haroon, *et al.*) **185,** 230, *dem*
Radiotherapy, The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*
Raphe nuclei, Serotonergic deficits in the raphe nuclei of AS/AGU rats (Stewart, *et al.*) **185,** 702, *P*
Rapid freezing, Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415
Rat, Continuous darkness and continuous light induce structural changes in the rat thymus (Mahmoud, *et al.*) **185,** 143
p185^{neu} is expressed in yolk sac during rat postimplantation development (Knezevic, *et al.*) **185,** 181
The role of nerve growth factor in attracting regenerating axons of a sectioned nerve towards the distal stump in rats (Doubleday & Robinson) **185,** 207, *P*
Differential expression of an endothelial barrier antigen (EBA) between the central and peripheral nervous systems of the rat (Lawrenson, *et al.*) **185,** 210, *P*
Pathogenesis of cerebral vasospasm following experimental subarachnoid haemorrhage in rat—a double haemorrhage model (Khalili & Clower) **185,** 210, *P*
Dopamine deficits in a novel mutant rat with impaired locomotion (Payne, *et al.*) **185,** 211, *P*
Oxytocin induces release of oxytocin from magnocellular dendrites and cell bodies of lactating female rats (Ward & Morris) **185,** 212, *P*
Rat thymulin-secreting cells (Stebbings & Kendall) **185,** 212, *P*
Noradrenergic innervation of the rat thymus during pregnancy and the postpartum period (Kendall, *et al.*) **185,** 213, *P*
The immunocytochemical localisation of alpha smooth muscle actin in interstitial cells of rat kidneys following

cyclosporin administration: an early marker of interstitial fibrosis (Shehata, *et al.*) **185,** 213, *P*
Immunocytochemical localisation of platelet derived growth factor (PDGF-BB) in hypertrophied juxtaglomerular cells of the kidneys of rats treated with cyclosporin (Cope, *et al.*) **185,** 213, *P*
Tracing axons in the fixed rat brain: an accelerated DiI procedure (Orange) **185,** 215, *P*
Down-regulation of serotonin transporter mRNA expression in the dorsal raphe nucleus of rat brain due to paroxetine (Swan) **185,** 215, *P*
Morphology and development of the main parotid duct of the rat (O'Boyle) **185,** 216, *P*
A morphometric study on the effects of growth hormone deficiency and reconstitution on the rat small intestine (Beer) **185,** 217, *P*
Effects of high fat diet on mucosa of the rat small intestine (Kalia) **185,** 218, *P*
Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*
Quantitative and morphological investigations of the phenomenon of persorption in the rat (Carr, *et al.*) **185,** 220, *P*
Hindpaw/floor contact area in the rat with unilateral ligation of the common iliac artery (Clarke & Rochester) **185,** 220, *P*
The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*
Hypertrophic response of the kidneys of normal and growth hormone deficient rats to uninephrectomy (Baillie, *et al.*) **185,** 226, *dem*
A morphometric study of rat uterus in hypothyroidism (Inuwa & Williams) **185,** 227, *dem*
Variation in the number and volume of villous and crypt epithelial cells along the rat small intestine (Zoubi, *et al.*) **185,** 227, *dem*
Morphometric assessment of the thyroid gland of the rat following methimazole treatment (Inuwa & Williams) **185,** 227, *dem*
Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*
Morphometric analysis into the effects of age on the rat hypogastric and 13th thoracic ganglia (Warburton & Santer) **185,** 229, *dem*
Computer aided learning programmes for surgery in the rat (Angel) **185,** 233, *dem*
Immunocytochemical localisation of Transforming Growth Factor Beta (TGF-β) in renal arterioles of normal and cyclosporin-treated rat kidneys (Raftery, *et al.*) **185,** 234, *dem*
Structural and functional changes within the diabetic rat heart (Otter, *et al.*) **185,** 235, *dem*
Endothelial injury of cerebral arteries following experimental subarachnoid haemorrhage in rat – a scanning electron microscopy study (Khalili & Clower) **185,** 235, *dem*
A functional and structural examination of aorta from streptozotocin diabetic rats (Otter, *et al.*) **185,** 235, *dem*
Analysis of GAP-43 protein distribution during differentiation of rat cerebellar granule cells in vitro (Przyborski & Cambray-Deakin) **185,** 236, *dem*
Developmental profile of GAP-43 mRNA expression in primary cultures of rat cerebellar granule cells (Przyborski & Cambray-Deakin) **185,** 236, *dem*
A high resolution study of the glycocalyx of rat uterine epithelial cells during early pregnancy with the field emission gun scanning electron microscope (Jones & Murphy) **185,** 443
A cluster analysis of the neurons of the rat interpeduncular nucleus (Gioia, *et al.*) **185,** 459
Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471
Perikaryal projections of spinal ganglion neurons: quantitative differences between membrane domains in contact with different microenvironments (Pannese, *et al.*) **185,** 497
A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537
Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553
Perichondrial and endochondral components of mandibular condylar growth: morphometric and autoradiographic quantitation in rats (Luder) **185,** 587
Increase in immunoreactivity to endothelin-1 in the mucosal vasculature and epithelium of the large intestine during chronic hypoxia (Dikranian, *et al.*) **185,** 609
The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617
Increased lectin binding capacity of trophoblastic cells of late day 5 rat blastocysts (Stein, *et al.*) **185,** 669
The distribution of atrial natriuretic peptide in various rat tissues (Lourens, *et al.*) **185,** 686, *P*
Histology of spinal cord development in the postnatal rat (de Villiers) **185,** 686, *P*
Histological changes following overdistension of the bladder in the rat (Greyling, *et al.*) **185,** 687, *P*
NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*
Serotonergic deficits in the raphe nuclei of AS/AGU rats (Stewart, *et al.*) **185,** 702, *P*
Epithelial cell number and phenotype along rat small intestine and the effects of streptozotocin-induced diabetes (Zoubi, *et al.*) **185,** 703, *P*
The relationship between mitochondrial morphology and myofibrillar content of myocardial cells in rats, hamsters and bats (Tagoe, *et al.*) **185,** 703, *P*
Comparison of AChE and PGP 9·5 in cerebrovascular nerves of the rat (Matthijssen, *et al.*) **185,** 707, *dem*
Extrinsic sources of calbindin-D28k immunoreactive fibres in rat stomach (Ali & Vaillant) **185,** 708, *dem*
Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75

Receptor autoradiography, Receptor autoradiography as a pharmacological tool (Bowery) **185,** 205, *P*

Rectum, A quantitative study of nucleolar organiser region volume density in the 'normal' human colorectal crypt (Morais, *et al.*) **185,** 709, *dem*

Regeneration, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Renal veins, A practical classification of the patterns of drainage of the renal veins (Satyapal & Mathura) **185,** 689, *P*

Reproductive system, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481

Resin embedding, High resolution light microscopy: quantitative studies using methacrylate resin embedding techniques in combination with histochemistry (Gerrits) **185,** 205, *P*

Resorption-repair coupling, Resorption-repair coupling in vitro (Gray, *et al.*) **185,** 230, *dem*

Respiratory disease, Ultrastructural changes in the pharnygeal tonsil of children suffering from recurrent respiratory diseases (Kapeller, *et al.*) **185,** 236, *dem*

Reticulated cells, The specialised structure of crypt epithelium in the human palatine tonsil and its functional significance (Perry) **185,** 111

Reticulin fibres, Experimental modulation of the reactivity of pleural milky spots (Kampmeier's foci) by Freund's adjuvants, betamethasone and mycobacterial infection (de Sousa Pereira, *et al.*) **185,** 471

Retinal ganglion cells, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intraorbital optic nerve (Zeng, *et al.*) **185,** 643

Retinofugal projection, Further evidence that formation of the

uncrossed retinofugal projection in ferrets involves interactions between fibres from the two eyes (Taylor & Guillery) **185,** 208, *P*

Retinoic acid, The effects of retinoic acid on primary cultured adult mouse sensory neurons (Chong, *et al.*) **185,** 228, *dem*

Retro-orbital venous sinus, The rodent retro-orbital venous sinus and the harderian gland in the golden hamster (McGadey, *et al.*) **185,** 225, *dem*

Rheumatoid arthritis, Morphology of high endothelial venules in human rheumatoid synovium (Brown, *et al.*) **185,** 210, *P*

Distribution and structure of plasma cells in synovial tissue from patients with rheumatoid arthritis (Perry, *et al.*) **185,** 221, *P*

Rousettus egypticus, Endocrine cells in the pancreas of the fruit bat, *Rousettus egyptiacus*: a quantitative and immunocytochemical study (Michelmore, *et al.*) **185,** 686, *P*

Saccostomus campestris, Preliminary observations on prenatal ossification in the pouched mouse (*Saccostomus campestris*) (Soley, *et al.*) **185,** 694, *P*

Salmo trutta fario, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241

The structure and development of dopaminergic interplexiform cells in the retina of the brown trout, *Salmo trutta fario*: a tyrosine hydroxylase immunocytochemical study (Becerra, *et al.*) **185,** 377

Salmonidae, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241

Satellite cells, Identification of proliferating mouse skeletal muscle satellite cells following compensatory overload and clenbuterol administration using confocal microscopy (Brotchie, *et al.*) **185,** 232, *dem*

Scatter factor, Hepatocyte growth factor (HGF/SF) is expressed in human epithelial cells during embryonic development; studies by in situ hybridisation and Northern blot analysis (Wang, *et al.*) **185,** 543

Sciatic nerve, Observations on the collagenous wavy pattern in the outer sheath of the human sciatic nerve (Stolinski) **185,** 211, *P*

Secondary hair follicles, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135

Seminal round cells, Macromolecular synthesis in human seminal round cells (Williams) **185,** 234, *dem*

Seminal vesicles, Neuropeptides and neuronal markers in the human vas deferens and seminal vesicle of infants and children (Dixon & Gosling) **185,** 701, *P*

Seminiferous epithelium, Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503

Sensory neurons, The effects of retinoic acid on primary cultured adult mouse sensory neurons (Chong, *et al.*) **185,** 228, *dem*

Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*

Perikaryal projections of spinal ganglion neurons: quantitative differences between membrane domains in contact with different microenvironments (Pannese, *et al.*) **185,** 497

Serotonin, Serotonergic deficits in the raphe nuclei of AS/AGU rats (Stewart, *et al.*) **185,** 702, *P*

Serotonin transporter, Down-regulation of serotonin transporter mRNA expression in the dorsal raphe nucleus of rat brain due to paroxetine (Swan) **185,** 215, *P*

Sex differences, Anatomical variations in the proximal part of the femur: differences between sexes and groups (Cutland) **185,** 684, *P*

***Sey* gene**, Morphometric study of the optic nerve of adult normal mice and mice heterozygous for the *Small eye* mutation (*Sey* /+) (Dangata, *et al.*) **185,** 627

Sheep, Allometric growth of the spinal cord in relation to the vertebral column during prenatal and postnatal life in the sheep (*Ovis aries*) (Ghazi & Gholami) **185,** 427

Sialic acid, Sialylation of terminal saccharides of glycoconjugates expressed by murine molar tooth germs developing in vitro and in vivo (Jowett, *et al.*) **185,** 85

Skeletal muscle, The fibre type composition of the rabbit latissimus dorsi muscle (Gillott, *et al.*) **185,** 173

Spinalis capitis, or an accessory paraspinous muscle? (Martin) **185,** 195

Skeletofusimotor axons, Intrafusal motor innervation: a quantitative histological analysis of tenuissimus muscle spindles in the cat (Banks) **185,** 151

Skin, Optimal conditions for the cryopreservation of cultured dermal fibroblast impregnated collagen gels (Teasdale) **185,** 215, *P*

Proliferation of the perineurium into the endoneurium in dermal nerves of the guinea pig (Salpadoru) **185,** 215, *P*

The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*

Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325

Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553

Skin substitutes, Ultrastructural features of composite skin cultures grafted onto athymic mice (Nolte, *et al.*) **185,** 325

Skull, Spinalis capitis, or an accessory paraspinous muscle? (Martin) **185,** 195

The fusion of ossification centres in the cartilaginous and membranous parts of the occipital squama in human fetuses (Matsumura, *et al.*) **185,** 295

Occipital roof development in the Japanese musk shrew, *Suncus murinus* (Niida, *et al.*) **185,** 433

Basicranial flexion, relative brain size and facial kyphosis in humans (Ross & Henneberg) **185,** 689, *P*

Cranial and postcranial growth reconstructed from skeletal material from the Iron Age site of K2 (Steyn & Henneberg) **185,** 692, *P*

***Small eye* mutant**, Morphometric study of the optic nerve of adult normal mice and mice heterozygous for the *Small eye* mutation (*Sey* /+) (Dangata, *et al.*) **185,** 627

Small intestine, A morphometric study on the effects of growth hormone deficiency and reconstitution on the rat small intestine (Beer) **185,** 217, *P*

Effects of high fat diet on mucosa of the rat small intestine (Kalia) **185,** 218, *P*

Variation in the number and volume of villous and crypt epithelial cells along the rat small intestine (Zoubi, *et al.*) **185,** 227, *dem*

Epithelial cell number and phenotype along rat small intestine and the effects of streptozotocin-induced diabetes (Zoubi, *et al.*) **185,** 703, *P*

Small pore system, Progress in structural identification of the small pore system in continuous capillaries (Firth, *et al.*) **185,** 695, *P*

Somatotopy, Somatotopy in the developing murine trigeminal system is established from the onset of neural outgrowth (Scott & Atkinson) **185,** 208, *P*

Somites, Occiptocervical segmentation in staged human embryos (Müller & O'Rahilly) **185,** 251

South African hominids, A morphometric study of the Carabelli trait in early South African hominids (Reid & van Reenen) **185,** 683, *P*

Spectrin, Membrane skeleton in fresh unfixed erythrocytes as revealed by a rapid-freezing and deep-etching method (Ohno, *et al.*) **185,** 415

Sperm, Physical interactions of human sperm with human uterine tube cells in vitro (Pacey, *et al.*) **185,** 218, *P*

Sperm tail formation, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301

Spermatids, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301

Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503

Spermatogenesis, Spermatogenesis and ultrastructure of a

peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503
Spermatozoa, Calcium-related changes in human spermatozoa using the chlortetracycline assay (Perry, *et al.*) **185,** 234, *dem*
Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503
Spermiogenesis, Centriole development and formation of the flagellum during spermiogenesis in the ostrich (*Struthio camelus*) (Soley) **185,** 301
Spinal cord, Allometric growth of the spinal cord in relation to the vertebral column during prenatal and postnatal life in the sheep (*Ovis aries*) (Ghazi & Gholami) **185,** 427
Histology of spinal cord development in the postnatal rat (de Villiers) **185,** 686, *P*
Spine, Allometric growth of the spinal cord in relation to the vertebral column during prenatal and postnatal life in the sheep (*Ovis aries*) (Ghazi & Gholami) **185,** 427
Spleen, The innervation of the splenic capsule in the guinea pig: an immunohistochemical and ultrastructural study (Elfvin, *et al.*) **185,** 267
Stomach, Extrinsic sources of calbindin-D28k immunoreactive fibres in rat stomach (Ali & Vaillant) **185,** 708, *dem*
Streptozotocin, Structural and functional changes within the diabetic rat heart (Otter, *et al.*) **185,** 235, *dem*
A functional and structural examination of aorta from streptozotocin diabetic rats (Otter, *et al.*) **185,** 235, *dem*
Epithelial cell number and phenotype along rat small intestine and the effects of streptozotocin-induced diabetes (Zoubi, *et al.*) **185,** 703, *P*
Structural changes, Continuous darkness and continuous light induce structural changes in the rat thymus (Mahmoud, *et al.*) **185,** 143
Subarachnoid haemorrhage, Pathogenesis of cerebral vasospasm following experimental subarachnoid haemorrhage in rat – a double haemorrhage model (Khalili & Clower) **185,** 210, *P*
Endothelial injury of cerebral arteries following experimental subarachnoid haemorrhage in rat – a scanning electron microscopy study (Khalili & Clower) **185,** 235, *dem*
Subchondral plate, Quantitative morphology of the subchondral plate of the tibial plateau (Milz & Putz) **185,** 103
Submucous plexus, Studies of the lymphatic vessel-associated neurons in the intestine of the guinea pig (Wang, *et al.*) **185,** 65
Suncus murinus, Spermatogenesis and ultrastructure of a peculiar acrosomal formation in the musk shrew, *Suncus murinus* (Kurohmaru, *et al.*) **185,** 503
Superior colliculus, Visual pathways from the cerebral cortex and superior colliculus to the cerebellum of macaques (Glickstein, *et al.*) **185,** 702, *P*
Suprascapular nerve, The cutaneous branch of the human suprascapular nerve (Ajmani) **185,** 439
Surface antigens, Immunophenotypic features of epiplexus cells and their response to interferon gamma injected intraperitoneally in postnatal rats (Lu, *et al.*) **185,** 75
Syncerus caffer, The neuromuscular junction in the African elephant (*Loxodonta africana*) and buffalo (*Syncerus caffer*): an ultrastructural study (Wolf, *et al.*) **185,** 691, *P*
Synovium, Morphology of high endothelial venules in human rheumatoid synovium (Brown, *et al.*) **185,** 210, *P*
Distribution and structure of plasma cells in synovial tissue from patients with rheumatoid arthritis (Perry, *et al.*) **185,** 221, *P*
The formation of human synovial joint cavities: a possible role for hyaluronan and CD44 in altered interzone cohesion (Edwards, *et al.*) **185,** 355

Teaching, Developments in the use of interactive laser videos for learning gross anatomy (Peel & Beanlands) **185,** 232, *dem*
Computer aided learning programmes for surgery in the rat (Angel) **185,** 233, *dem*
Kodak Photo-CD in the teaching of the anatomical sciences (Stewart & Beanlands) **185,** 233, *dem*
Evaluation of different forms of user interactions in computer based learning (CBL) packages for medical students constructed with Authorware Professional (Castle, *et al.*) **185,** 233, *dem*
Feedback evaluation of computer assisted learning (CAL) packages for medical students (Thomas) **185,** 234, *dem*
Tectum posterius, Occipital roof development in the Japanese musk shrew, *Suncus murinus* (Niida, *et al.*) **185,** 433
Teeth, Age at metabolic insults causing enamel hypoplasia in an Ancient population of Metaponto, Italy (Henneberg) **185,** 683, *P*
Shovel-shaped incisors in the Vassekela and Hereros (Navsa & van Staden) **185,** 683, *P*
Mandibular third molar agenesis in the South African Black population (Chorn & Henneberg) **185,** 684, *P*
Changes in the cell-free zone and cell-rich zone of human dental pulp with increasing age (Peverini & Daly) **185,** 691, *P*
The use of resin casts to examine the effects of pulsed NdYAG lasers on human teeth (McGadey, *et al.*) **185,** 710, *dem*
Sialylation of terminal saccharides of glycoconjugates expressed by murine molar tooth germs developing in vitro and in vivo (Jowett, *et al.*) **185,** 85
Teleost, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241
Teleost fish, The structure and development of dopaminergic interplexiform cells in the retina of the brown trout, *Salmo trutta fario*: a tyrosine hydroxylase immunocytochemical study (Becerra, *et al.*) **185,** 377
Temporomandibular disc, Age-related changes to the surface ultrastructure of the rabbit temporomandibular disc (Shaw & Molyneux) **185,** 577
Tendon, Immunohistochemical distribution of type I, II and III collagens in the rabbit supraspinatus tendon insertion (Kumagai, *et al.*) **185,** 279
Testis, Macromolecular synthesis in human seminal round cells (Williams) **185,** 234, *dem*
Growth factors in the human fetal testis (Balboni, *et al.*) **185,** 703, *P*
Thalamus, Quantitative computer image analysis techniques as applied to a study of GABAergic systems in the thalamus (Kultas-Ilinsky) **185,** 206, *P*
Thermoregulation, The harderian gland: a tercentennial review (Payne) **185,** 1
Thoracic duct, Variations in the thoracic duct of the Japanese monkey (*Macaca fuscata*) (Inoue & Makita) **185,** 189
Thymulin-secreting cells, Rat thymulin-secreting cells (Stebbings & Kendall) **185,** 212, *P*
Thymus, Continuous darkness and continuous light induce structural changes in the rat thymus (Mahmoud, *et al.*) **185,** 143
Rat thymulin-secreting cells (Stebbings & Kendall) **185,** 212, *P*
Structural changes in the mouse thymus during pregnancy (Clarke, *et al.*) **185,** 212, *P*
Noradrenergic innervation of the rat thymus during pregnancy and the postpartum period (Kendall, *et al.*) **185,** 213, *P*
The noradrenergic innervation of the rat thymus during pregnancy and in the post partum period (Kendall, *et al.*) **185,** 617
Thyroid gland, Morphometric assessment of the thyroid gland of the rat following methimazole treatment (Inuwa & Williams) **185,** 227, *dem*
Tibial plateau, Quantitative morphology of the subchondral plate of the tibial plateau (Milz & Putz) **185,** 103
Tissue culture, Growth of secondary hair follicles of the cashmere goat in vitro and their response to prolactin and melatonin (Ibraheem, *et al.*) **185,** 135
The effects of retinoic acid on primary cultured adult mouse sensory neurons (Chong, *et al.*) **185,** 228, *dem*
Nerve orientation with conflicting guidance cues (McCaig, *et al.*) **185,** 228, *dem*
The cell line NTera 2 in the study of common neurodegenerative diseases (Watson, *et al.*) **185,** 228, *dem*
Variation in the temporal expression of putative adhesion molecules by neurons in rat dorsal root ganglia in vivo and in vitro (Relf, *et al.*) **185,** 229, *dem*
Toe growth, Linear growth of chick third toe between stages 36

and 44 facilitates accurate staging; Hamburger and Hamilton revisited (Lawton, *et al.*) **185,** 231, *dem*

Tonsil, Accessory cells in the human palatine tonsil (Bryan, *et al.*) **185,** 224, *dem*

Ultrastructural changes in the pharnygeal tonsil of children suffering from recurrent respiratory diseases (Kapeller, *et al.*) **185,** 236, *dem*

Touch domes, Ultrastructural study of the Merkel cell and its expression of met-enkephalin immunoreactivity during fetal and postnatal development in mice (Cheng Chew & Leung) **185,** 511

Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553

Transferrin, A bromodeoxyuridine labelling study of proliferating cells in the brainstem following hypoglossal nerve transection (Svensson, *et al.*) **185,** 537

Transforming growth factor beta, Immunocytochemical localisation of Transforming Growth Factor Beta (TGF-β) in renal arterioles of normal and cyclosporin-treated rat kidneys (Raftery, *et al.*) **185,** 234, *dem*

Treponemal infection, A possible case of treponemal infection from the Iron Age site of K2 (Henneberg & Steyn) **185,** 691, *P*

Trigeminal system, Somatotopy in the developing murine trigeminal system is established from the onset of neural outgrowth (Scott & Atkinson) **185,** 208, *P*

Trophoblastic cells, Increased lectin binding capacity of trophoblastic cells of late day 5 rat blastocysts (Stein, *et al.*) **185,** 669

Trout, The liver of the brown trout, *Salmo trutta fario*: a light and electron microscope study (Rocha, *et al.*) **185,** 241

Tubuloglomerular feedback control, Lectin-binding sites and silver affinity of the macula densa basement membranes in the rabbit kidney (Ojeda & Piedra) **185,** 529

Tumour invasion, In vitro and in vivo activity of synthetic urokinase plasminogen activator (uPA) fragments on angiogenesis and tumour invasion (Allen, *et al.*) **185,** 697, *P*

Tylotrich follicles, Innervation of the tylotrich–touch dome complexes in rat skin: changing patterns during postnatal development (Casserly, *et al.*) **185,** 553

Type 1 diabetes, Pancreatic duct inflammatory infiltration in the nonobese diabetic (NOD) mouse (Papaccio, *et al.*) **185,** 465

Ultraviolet light, A scanning electron microscope study of the pecten oculi of the black kite (*Milvus migrans*): possible involvement of melanosomes in protecting the pecten against damage by ultraviolet light (Kiama, *et al.*) **185,** 637

Umbilical artery waveforms, Umbilical arterial waveforms and stereological estimates of the vasculature in normal term human placentas (Burton & Jauniaux) **185,** 222, *dem*

Urinary bladder, NADPH diaphorase and nitric oxide synthase are expressed by the majority of intramural neurons in the neonatal guinea pig urinary bladder (Saffrey, *et al.*) **185,** 487

Histological changes following overdistension of the bladder in the rat (Greyling, *et al.*) **185,** 687, *P*

Urokinase plasminogen activator, In vitro and in vivo activity of synthetic urokinase plasminogen activator (uPA) fragments on angiogenesis and tumour invasion (Allen, *et al.*) **185,** 697, *P*

Uterine tube, Morphometric evidence of changes in the vasculature of the uterine tube of mice induced by the 2-cell embryo on the second day of pregnancy (Stein & O'Neill) **185,** 397

Physical interactions of human sperm with human uterine tube cells in vitro (Pacey, *et al.*) **185,** 218, *P*

Changes in surface area along human uterine tubes (Hill, *et al.*) **185,** 222, *dem*

Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481

Regulation of different gap junctional connexins in rat endometrium during early pregnancy (Grümmer, *et al.*) **185,** 218, *P*

Effects of an anti-oestrogen on normal human endometrial stroma around the time of implantation (Bulut, *et al.*) **185,** 224, *dem*

A morphometric study of rat uterus in hypothyroidism (Inuwa & Williams) **185,** 227, *dem*

A high resolution study of the glycocalyx of rat uterine epithelial cells during early pregnancy with the field emission gun scanning electron microscope (Jones & Murphy) **185,** 443

Vagina, Anatomy of adult female common marmoset (*Callithrix jacchus*) reproductive system (Cui & Matthews) **185,** 481

Varicose veins, Varicose veins: stereological analysis of the regional contents of collagen, elastin and smooth muscle (Brookes) **185,** 217, *P*

Vas deferens, Neuropeptides and neuronal markers in the human vas deferens and seminal vesicle of infants and children (Dixon & Gosling) **185,** 701, *P*

Vascular endothelial cells, Human term placental capillary endothelial cell specialisation: a morphometric and enzyme histochemical study (Karimu & Burton) **185,** 219, *P*

Vascular endothelium, Endothelial injury of cerebral arteries following experimental subarachnoid haemorrhage in rat—a scanning electron microscopy study (Khalili & Clower) **185,** 235, *dem*

Perivascular demyelination and intramyelinic oedema in reperfusion nerve injury (Nukada & McMorran) **185,** 259

Vascular innervation, Human cerebrovascular nerves of the circle of Willis: topographical distribution and changes with ageing and Alzheimer's disease (Bleys, *et al.*) **185,** 700, *P*

Vasculature, The vascular system of human fetal long bones: a scanning electron microscope study of corrosion casts (Skawina, *et al.*) **185,** 369

Ultrastructure of blood vessels in the head kidney of the carp, *Cyprinus carpio* (Imagawa, *et al.*) **185,** 521

Anatomical variants of the human renal and gonadal vasculature (de Villiers) **185,** 684, *P*

Histology of the ascending aortic fold in a nonhuman primate, *Papio ursinus* (Lebona) **185,** 687, *P*

A practical classification of the patterns of drainage of the renal veins (Satyapal & Mathura) **185,** 689, *P*

A possible secular trend in the incidence of anatomical variations in the renal vasculature (Satyapal & Henneberg) **185,** 692, *P*

Morphometry of the human renal veins in a South African population (Satyapal) **185,** 693, *P*

Non-planar curvature and branching of arteries: implications for arterial wall shear, biology and disease (Caro, *et al.*) **185,** 696, *P*

Haemodynamic factors influence taper in the basilar artery of man (Ravensbergen, *et al.*) **185,** 699, *P*

Postmortem analysis of atherosclerotic human femoral arteries: paradoxical vessel wall shrinkage contributes to stenosis (Pasterkamp, *et al.*) **185,** 699, *P*

Spiralling atherosclerotic lesions in the femoral artery (Wensing, *et al.*) **185,** 700, *P*

Human cerebrovascular nerves of the circle of Willis: topographical distribution and changes with ageing and Alzheimer's disease (Bleys, *et al.*) **185,** 700, *P*

Tortuosity of the femoral artery during leg flexion: evaluation with MR angiography and cryomicrotomy (Wensing, *et al.*) **185,** 705, *dem*

Prostaglandins control the spatial organisation of blood vessels during angiotensin II induced angiogenesis in the chick embryo (Le Noble, *et al.*) **185,** 705, *dem*

Do cerebral arteries adapt their size to haemodynamic conditions following the principle of minimum work? (van der Zwan, *et al.*) **185,** 706, *dem*

Vascularisation of the latissimus dorsi muscle for cardiac assist (Craven, *et al.*) **185,** 706, *dem*

The relation between atherosclerosis and blood flow in the basilar artery (Kritger, *et al.*) **185,** 706, *dem*

Comparison of AChE and PGP 9·5 in cerebrovascular nerves of the rat (Matthijssen, *et al.*) **185,** 707, *dem*
Whole mount sequential double staining for PGP 9·5 and NPY in human cerebrovascular nerves (Thunnissen, *et al.*) **185,** 707, *dem*
Vasculogenesis, Vasculogenesis in the embryo (Gittenberger-De Groot, *et al.*) **185,** 695, *P*
Regulation of embryonic blood vessel growth and differentiation (Wilson) **185,** 696, *P*
Growth of vessels in adult cardiac and skeletal muscle under physiological and pathological cirucumstances (Hudlicka) **185,** 696, *P*
Development of the cardiac vasculature studied in chicken–quail chimeras (Poelmann, *et al.*) **185,** 698, *P*
The embryology of the 5th pharyngeal arch artery (de Ruiter & Gittenberger-De Groot) **185,** 699, *P*
Vasospasm, Pathogenesis of cerebral vasospasm following experimental subarachnoid haemorrhage in rat—a double haemorrhage model (Khalili & Clower) **185,** 210, *P*
Veins, The fine structure of the human ovarian vein (Stones, *et al.*) **185,** 285
Vertebrae, Occiptocervical segmentation in staged human embryos (Müller & O'Rahilly) **185,** 251
Vessel-associated neurons, Studies of the lymphatic vessel-associated neurons in the intestine of the guinea pig (Wang, *et al.*) **185,** 65
Videos, Developments in the use of interactive laser videos for learning gross anatomy (Peel & Beanlands) **185,** 232, *dem*
VIP, NADPH-diaphorase and VIP are colocalised in neurons of the rat hypogastric ganglion and represent a relatively age resistant population (Warburton & Santer) **185,** 701, *P*
Visual pathways, Further evidence that formation of the uncrossed retinofugal projection in ferrets involves interactions between fibres from the two eyes (Taylor & Guillery) **185,** 208, *P*
Visual pathways from the cerebral cortex and superior colliculus to the cerebellum of macaques (Glickstein, *et al.*) **185,** 702, *P*
Vomeronasal organ, The microanatomy of the vomeronasal organ of the male goat (Green & Baker) **185,** 687, *P*

X-irradiation, The effect of intraoperative radiotherapy in the revascularisation of free full thickness skin autografts in the rat (Wang, *et al.*) **185,** 224, *dem*

Yolk sac, p185^{neu} is expressed in yolk sac during rat postimplantation development (Knezevic, *et al.*) **185,** 181
Intracardiac blood flow patterns related to the yolk sac circulation of the chick embryo (Hogers, *et al.*) **185,** 698, *P*

Zoladex, Ultrastructural effects of 'Zoladex' in vivo on gonadotrophs of normal and hpg mice (Durnin & Morris) **185,** 214, *P*
